Digital Transformation in Education and Artificial Intelligence Application Tomislav Volarić, Boris Crnokić, Daniel Vasić, 2024-07-02 This book constitutes selected papers presented during the Second International Conference on Digital Transformation in Education and Artificial Intelligence Applications MoStart 2024 held in Mostar Bosnia and Herzegovina in April 2024. The 17 papers were selected from the 32 submissions. The proceedings cover a broad range of topics computer vision, natural language processing, and the latest advancements in the digital transformation of education. Notably, the application of artificial intelligence, the incorporation of gamification and robotics into learning processes, and innovative technologies such as IoT have been thoroughly explored.

Frontier Research on Artificial Intelligence and Radiomics

in Neurodegenerative Diseases Shi-Nan Wu, Wencai Liu, Qi Zhang, Fuqing Zhou, 2025-11-13 As the global population ages, the prevalence of neurodegenerative diseases is rising, posing significant challenges to healthcare systems. Artificial intelligence, AI, and radiomics are emerging as powerful tools in this domain, offering innovative methods for diagnosing, monitoring, and treating these conditions. Radiomics enables the extraction of quantitative features from medical images, while AI excels at analyzing large datasets and identifying patterns that might be imperceptible to the human eye. The integration of these technologies, particularly in neuroimaging, holds the potential to revolutionize our understanding and management of neurodegenerative diseases. The goal of this research is to address the complex challenges posed by neurodegenerative diseases through the application of AI and radiomics. Specifically, we aim to:

1. Identify and validate novel imaging biomarkers for the early detection and monitoring of neurodegenerative disorders.
2. Develop AI-driven predictive models to assess disease progression and treatment outcomes, enabling personalized healthcare approaches.
3. Utilize machine learning and database mining techniques to analyze extensive health datasets, uncovering new insights and correlations specific to neurodegenerative diseases.
4. Evaluate the clinical utility of these technologies in enhancing diagnostic accuracy, improving patient outcomes, and optimizing healthcare resources.

Proceedings of the 2025 4th

International Conference on Social Sciences and Humanities and Arts (SSHA 2025) Sun Jing, Sun Hefei, Liu Shuli, Ren Xianpin, Cuneyt Birkok, 2025-07-22 This is an open access book. With the progress of social civilization, social science and its research are becoming more and more important. Theoretically and practically, the study of social phenomena and social problems and the development of prosperous social sciences are the eternal themes of human beings. At present, social science research and its results can hardly meet the needs of social development, especially the unscientific evaluation of social science results, which has aroused great concern from all walks of life and has produced dirt and questions on social science, thus affecting the proper development of social science. Max Weber once said that the most important function of social science in modern times is to keep people clear-headed and to resist the delusions of prophetic legislators. Humanities and arts are the process of perceiving, realizing, thinking, manipulating, and expressing objective or subjective objects through

capturing and excavating feeling and analyzing integrating and applying or displaying the stage results in the form obtained through feeling seeing hearing smelling touching The social sciences and humanities and arts contain content that will directly affect our lives and the way society functions And by reacting to today s increasingly intricate problems and situations through systematic and professional discussions they will further contribute to the improvement of institutions and the development of society By thinking about issues and looking at problems and the world from different perspectives by putting the two together it may be possible to have more comprehensive appropriate and better responses for example the development of laws requires a deeper understanding of the environment in which they are implemented international trade requires a certain understanding of the customs of different countries and the development of tax and economic policies requires a certain understanding of the population consumer demand etc
