Cyber-worthiness in Shipping Furkan Dogan,2026-02-11 As the maritime industry undergoes a technological transformation traditional legal doctrines must evolve to address new challenges This book explores the legal and operational implications of Maritime Autonomous Surface Ships MASS and the increasing reliance on digital systems in modern shipping While automation and digitalisation enhance efficiency and safety they also introduce unprecedented cyber risks that threaten global supply chains financial stability and regulatory compliance Redefining the concept of seaworthiness by incorporating cyber worthiness and communication worthiness this book ensures that vessels are not only physically fit for sea travel but also resilient against cyber threats and equipped with secure communication systems By analysing international regulations such as UNCLOS SOLAS STCW and marine insurance frameworks the book identifies critical legal gaps and proposes necessary updates to align with the digital age Through a legal and interdisciplinary approach the book offers practical recommendations for policymakers insurers and maritime operators It outlines robust cybersecurity measures updates to insurance policies and regulatory frameworks that safeguard against evolving cyber threats Providing maritime lawyers insurers shipowners and policymakers with clear guidance on how to navigate legal uncertainties surrounding autonomous vessels cybersecurity risks and liability issues the book offers practical solutions for insurance policies charterparties and contractual clauses ensuring that risks associated with cyber threats remote operation and digital failures are adequately addressed For practitioners this book solves pressing legal and operational problems It clarifies how existing maritime regulations such as UNCLOS SOLAS and the ISM Code apply to autonomous and digitalised ships identifies gaps in current legal frameworks and proposes necessary updates to ensure compliance

Reader Bot Naomi S. Baron,2026-01-20 What happens to human reading when AI bots can do it for us Explosive developments in artificial

intelligence have awed everyday users with the technology's ability to draw code computer coding and especially to write. Those AI-generated essays and poems, legal briefs and responses to requests for information are all visible evidence of large language models at work. What we don't see is the critical prior step before it can write: AI needs to read. While AI's written outcomes are remarkably similar to what a diligent student lawyer or researcher might produce, AI doesn't read the way that humans do. Now that AI is proving an adept reader, what happens to our own reading skills and motivations, especially at a time when both voluntary and school reading are increasingly on the decline? We have learned that when we let chatbots write for us, there are pros and cons to handing over our virtual pens. It's critical that we also think through the consequences of relinquishing reading, a deeply human activity, to bots. What do we stand to gain and lose when we let AI read for us?

Tracing the intersecting trajectories of AI and reading, *Reader Bot* tackles this vital question, revealing why we must be thoughtful about how we welcome AI as reader into our lives. **Health Equity** Renata Schiavo, Jennifer Weiss, 2026-02-03 A must-read resource to help you advance health equity across communities, organizations, cities, and world regions. In *Health Equity Strategies for Action*, an array of pioneering health equity-focused researchers, educators, practitioners, and policy specialists from multiple sectors and disciplines deliver an incisive guide to health equity: why it matters, how to achieve it, and the state of the health equity movement across national and global settings. Grounded in a multisectoral and community-driven approach to health equity solutions, this book walks you through key principles and practical approaches to advancing health equity and overcoming commonly encountered barriers to people's health and well-being, including key social, structural, and political determinants of health. The book features effective action areas and strategies to address health inequities across issues of racism, gender, immigration, poverty, age, and other socially determined factors, and highlights relevant case studies and lessons learned. *Health Equity Strategies for Action* is an essential resource for graduate and undergraduate courses on the topic. Professionals in fields as broad as public health, architecture, and urban planning, social work, medicine, technology, early childhood, healthcare, community development, human rights, philanthropy, vital statistics, and disability advocacy who seek to integrate a health equity lens in their work will also find this to be a vital guidebook in furthering their health equity goals. Policymakers and elected officials can also use this book to enhance their knowledge on health equity, an approach to improve health for all whose importance will only continue to grow. Mastering AI for Strategic Business Success Jonas Debrulle, Loïc Plé, Elliroma Gardiner, 2025-10-14 In the rapidly evolving landscape of modern business, artificial intelligence (AI) has emerged as a transformative force, redefining how organizations operate, compete, and thrive. The advent of AI has introduced unprecedented opportunities and challenges, compelling business leaders to navigate a complex intersection of technology and strategy. This book provides readers with the tools and perspectives necessary to harness the power of AI responsibly, ethically, and effectively, ultimately driving strategic business success. It is an indispensable and comprehensive resource for anyone seeking to understand the strategic implications of AI, its role in

shaping the future of business and how to leverage AI for strategic advantage Key Features Designed with alternating strategy and technology focused chapters that are tightly interwoven the text provides A clear integrated framework that links AI technologies directly to core strategic business decisions and operational actions Cutting edge case studies and examples illustrating how organizations across sectors are deploying AI to gain a competitive edge Companies discussed include amongst others Netflix Amazon Spotify Ocado the Adecco Group 9altitudes NatWest Group and AlterEos Pedagogical tools such as learning objectives real world examples and applications of AI and in depth discussions of technical aspects of AI support comprehension critical thinking and classroom discussion Digital support via McGraw Hill s Connect platform offering data driven simulations videos case studies and a wide bank of test questions for enhanced learning and engagement

Dr Jonas Debrulle is an Associate Professor at I SEG School of Management in France and the Faculty of Economics and Business at KU Leuven in Belgium Previously he was Director of Programs at I SEG overseeing undergraduate and postgraduate programs He currently teaches international strategic management technology entrepreneurship and the impact of AI on business development Dr Lo c Pl is a Professor of Strategic Management and Director of Teaching and Learning at IESEG School of Management He has a Ph D in Management Sciences from University Paris Dauphine PSL He created I SEG Center for Educational and Technological Innovation CETI in 2009 promoting the use of technology to benefit teaching and learning Dr Elliroma Gardiner is an Organisational Psychologist and Associate Professor at QUT Business School in Australia With over 18 years of experience teaching and researching across Australia Asia and Europe she has held academic positions at the London School of Economics I SEG School of Management and Griffith University

□ **The Model Context Protocol: Unifying AI Communication** Etienne Noumen, The Model Context Protocol Unifying AI Communication This episode introduces the Model Context Protocol MCP an open standard designed to enable seamless communication between AI agents and external data sources or tools much like a universal adaptor It addresses the N M integration problem where connecting numerous AI models to various tools creates an unsustainable development burden The show explains MCP s three tier architecture consisting of a Host the user facing application an MCP Client which manages sessions and an MCP Server which translates requests for data sources like databases or APIs Furthermore it details how MCP uses JSON RPC 2 0 for messaging and supports dynamic discovery of capabilities alongside critical security principles for implementation Finally it distinguishes MCP from other standards highlighting its complementary role with the Agent to Agent A2A Protocol for multi agent collaboration
