**The Playful Politics of Memes** Mette Mortensen, Christina Neumayer, 2023-05-22 Memes work as rhetorical weapons and discursive arguments in political conflicts Across digital platforms they confirm contest and challenge political power and hierarchies They simultaneously create social distortion hostility and a sense of community Memes thus not only reflect norms but also work as a tool for negotiating them At the same time memes meld symbolic and cultural elements with technological functionalities allowing for replicability and remixing This book studies how memes disrupt and reimagine politics in humorous ways Memes create a playful activity that follows a shared set of rules and gives a shared voice which may generate togetherness and political identities but also increase polarization As their template travels memes continue to appropriate new political contexts and to re negotiate frontiers in the political The chapters in this book allow us to chart the playful politics of memes and how they establish or push frontiers in various political cultural and platform specific contexts Taken together memes can challenge and regenerate populism carve out spaces for new identity formations and create togetherness in situations of crises They can also however lead to the normalization of racist discourses This book will be of interest to researchers and advanced students of Media and Communication Studies Information Studies Politics Sociology and Cultural Studies It was originally published as a special issue of the journal Information Communication Society

**The Mediated Climate** Adrienne Russell, 2023-08-08 To what extent does journalism deserve blame for the failure to address climate change over the last thirty years Critics point out that climate coverage has often lacked necessary urgency and hewed to traditional notions of objectivity and balance that allowed powerful interests mainly fossil fuel companies to manufacture doubt Climate journalism however developed alongside the digital media landscape which is characterized by

rampant misinformation political polarization unaccountable tech companies unchecked corporate power and vast inequalities Under these circumstances journalism struggled and bad actors flourished muddling messages while emissions mounted and societies struggled to avert catastrophe The Mediated Climate explores the places where the climate and information crises meet examining how journalism activism corporations and Big Tech compete to influence the public Adrienne Russell argues that the inadequate response to climate change is intertwined with the profound challenges facing the communications environment She demonstrates that the information crisis is driven not only by technological changes but also by concentrated power that predates the rise of digital media companies Efforts to improve climate coverage must take into account the larger social and material contexts in which journalism operates and the broader power dynamics that shape public discourse Drawing on interviews with journalists and activists Russell considers the ways recent movements are battling misinformation She offers timely recommendations to foster engagement with climate issues and calls on readers to join in efforts to reshape the media landscape to better serve the public interest
