Media Today Joseph Turow, 2026-03-05 This ninth edition of Joseph Turow's pathbreaking media textbook uses convergence as a lens that puts students at the center of the profound changes in the 21st century media world. It teaches students to think critically about the role of media and what these changes mean for their lives. The book's media systems approach helps students to look carefully at how media content is created, distributed, and exhibited in the new world that the digital revolution has created. From news media to video games and social networking to mobile platforms and streaming, it provides students with the tools they need to understand and critique the media they encounter and consume. The first part examines the media world as a whole, while the second delves deep into key media industries such as the movie, television, and video game industries. This new edition includes critical expanded coverage of social media, economies, cross-border media issues, the rise of news influencers and subscription platforms, and the growing use of predictive and generative artificial intelligence, as well as brand new case studies and updated figures, tables, and pedagogy, including key terms and further activities. Media Today is an excellent introduction to the world of media in the digital age, perfect for students seeking a solid grounding in media studies. Extensive pedagogical materials also make this a highly teachable book, well suited to the classroom. The accompanying website has also been updated with new student and instructor resources, including chapter recaps, recommended readings, and an instructor's manual.

Beyond the Screen

Frank A. Aycock, 2025-11-26 Written in an accessible style, this book explores the complex future of television across its different industries, providing professional producers with key insights and pathways to adapt and prepare. By exploring traditional media industries and how they have come to make up today's streaming and broadcasting media world, the text provides a detailed discussion of the future of systems programming and television viewing. This includes a wide range of topics such as internet protocol television (IPTV), set-top boxes (STBs), ATSC 3.0, virtual reality (VR), holographic television, and artificial intelligence (AI), as well as other cutting-edge technologies. Additionally, this book examines the future of content monetization by exploring the new and sometimes controversial ways of advertising, product placement, and search and promotion that will be required to be financially successful in this future television environment. Beyond the Screen is an indispensable addition to the library of every television professional, academic student, and television viewer who wants to know where this fascinating world of television is heading and what it will take to be successful within it.

The Film of the Islamic State

Yorck Beese, 2024-05-27 The film of the so-called Islamic State is part of the still relatively opaque history of radical Sunni Islamist video propaganda, a field in

which it is simultaneously its strongest exponent Through its imports of aesthetics in the age of digitalization and the concurrent de professionalization of film this violent propaganda film has interestingly drawn attention for its seeming likeness to Hollywood film an odd comparison that the Islamic State itself opposes through its own filmic antagonisms to commercial cinema In an intermittent attempt at attacking cinematic illusionism it has made increasing use of cinematic devices in order to communicate its violent and anti humanist ideology and has thereby entered a state of filmic self contradiction This book analyzes and uncovers the mechanisms and dynamics of ideological communication in the Islamic State s videos through a combined historical and neoformalist approach making them predictable for future researchers
