Conversing in the Metaverse Jieun Kiaer, 2024-07-25 How do metaverse technologies change how we communicate with each other? This book explores how existing metaverse technologies affect our communication, both verbal and non-verbal, as well as the ramifications of these effects. Communication is central to the human experience and how we currently communicate and will communicate can affect our sense of identity and relationships with others, which can have huge long-term societal repercussions. Utilising methods of digital ethnography and linguistic landscape, this book takes an in-depth look at what exactly the metaverse is or will be and tracks the technological and societal trends that surround it. To do so, it questions what differentiates the metaverse from earlier connected virtual worlds like World of Warcraft or Second Life and features extracts from interviews with the users and developers of current metaverses such as Roblox, Minecraft and Gather.town. It also investigates the impact of the pandemic in changing and accelerating how we communicate in virtual spaces.

Music in Esports Eulalia Febrer-Coll, 2025-07-21 This book invites the reader to expand their idea of esports as an independent niche and consider it an integral part of a growing multi- and transmedia ecosystem that includes the global entertainment industry where music plays an essential role. The music present in and around esports games is an integral part of how they are communicated and mediated and, as such, holds a central role in binding their narratives cohesively and coherently to appeal to their audiences. Popular music theory is placed at the foundation of the issues raised in the chapters as it is taken as a cornerstone for linking the esports international scene with the music industry. This text uses specific case studies from popular esports to support and illustrate each chapter, including League of Legends, Counter Strike and Fortnite. This book will be of great interest to researchers and students in the fields of esports game design and development, musicology and media studies.

Regulating the Metaverse Ignas Kalpokas, Julija Kalpokienė, 2023-01-26 The metaverse seems to be on everybody's lips and yet very few people can actually explain what it means or why it is important. This book aims to fill the gap from an interdisciplinary perspective informed by law and media and communications studies. Going beyond the optimism emanating from technology companies and venture capitalists, the authors critically evaluate the antecedents and the building blocks of the metaverse, the design and regulatory challenges that need to be solved and commercial opportunities that are yet to be fully realised. While the metaverse is poised to open new possibilities and perspectives, it will also be a dangerous place one

ripe with threats ranging from disinformation to intellectual property theft to sexual harassment. Hence the book offers a useful guide to the legal and political governance issues ahead while also contextualising them within the broader domain of governance and regulation of digital technologies. *Leadership in the Metaverse* Carol A.
