Applications of AI and Machine Learning in Finance and Economics Alessia Paccagnini, Maria Iannario, Joerg Osterrieder, Adamaria Perrotta, Fabio Parla, Hanna Kristín Skaftadóttir, 2025-11-19 This Research Topic is in collaboration with the Women in FinTech and AI 2024 conference. Extended versions of work presented at the conference are welcome. In today's rapidly evolving economic landscape, the integration of artificial intelligence (AI) in finance and economics has become paramount. AI, fueled by unprecedented computational power and sophisticated algorithms, has the potential to revolutionize decision-making processes, risk management, and predictive analytics within the financial sector. Its adaptive capabilities and data-driven insights contribute to more informed strategies, driving efficiency and innovation. Moreover, the era of big data has ushered in a new paradigm where vast and diverse datasets serve as a cornerstone for informed decision-making. The intersection of big data and finance allows for a granular understanding of market dynamics, customer behavior, and economic trends. Harnessing the power of big data alongside AI not only empowers financial institutions to navigate complexities but also lays the foundation for sustainable and resilient financial systems in an interconnected global economy. We invite researchers and professionals to contribute to a special issue of *Frontiers in Artificial Intelligence* dedicated to the intersection of artificial intelligence and economics and finance. This special issue aims to explore cutting-edge advancements in various areas, including but not limited to: Big Data applied to finance, natural language processing in economics, digital finance, and sustainability; AI for financial markets and blockchain applications. We welcome submissions on a wide range of topics, including: Big Data applications in finance and economics; Natural language processing in economic and financial contexts; Digital finance and its implications for sustainability; Artificial intelligence in financial markets; Blockchain applications in finance; Artificial intelligence for peer-to-peer finance; Network analysis in finance; Artificial intelligence in Green Finance and Climate Change; Behavioral finance. *Generative AI for Trading and Asset Management* Hamlet, Jesse Medina Ruiz, Ernest P. Chan, 2025-04-30 Expert guide on using AI to supercharge traders' productivity, optimize portfolios, and suggest new trading strategies. *Generative AI for Trading and Asset Management* is an essential guide to understand how generative AI has emerged as a transformative force in the realm of asset management, particularly in the context of trading. Due to its ability to analyze vast datasets, identify intricate patterns, and suggest complex trading strategies, practically, this book explains how to utilize various types of AI: unsupervised learning, supervised learning, reinforcement learning, and large language models to suggest new trading strategies, manage risks, optimize trading strategies and portfolios, and generally improve the productivity of algorithmic and discretionary traders alike. These techniques converge into an algorithm to trade on the Federal Reserve chair's press conferences in real time. Written by Hamlet Medina, chief data scientist at Criteo, and Ernie Chan, founder of QTS Capital Management and Predictnow.ai, this book explores topics including: How large language models and other machine learning techniques can improve productivity of algorithmic and discretionary traders from ideation.

signal generations backtesting risk management to portfolio optimization The pros and cons of tree based models vs neural networks as they relate to financial applications How regularization techniques can enhance out of sample performance Comprehensive exploration of the main families of explicit and implicit generative models for modeling high dimensional data including their advantages and limitations in model representation and training sampling quality and speed and representation learning Techniques for combining and utilizing generative models to address data scarcity and enhance data augmentation for training ML models in financial applications like market simulations sentiment analysis risk management and more Application of generative AI models for processing fundamental data to develop trading signals Exploration of efficient methods for deploying large models into production highlighting techniques and strategies to enhance inference efficiency such as model pruning quantization and knowledge distillation Using existing LLMs to translate Federal Reserve Chair s speeches to text and generate trading signals Generative AI for Trading and Asset Management earns a well deserved spot on the bookshelves of all asset managers seeking to harness the ever changing landscape of AI technologies to navigate financial markets

AI Investment Ratings Thomas Burke, 2024 The rapid pace of innovation in artificial intelligence continues to prove beneficial across various business domains Recent research studies highlight ChatGPT s robust ability to interpret text and conduct sentiment analysis For instance Lopez Lira Tang 2023 demonstrated ChatGPT s proficiency by observing cumulative returns of 500% over a 14 month period through its analysis of news announcements Similarly Pelster Val 2024 identified a strong positive correlation between ChatGPT s assessment of web articles for investment attractiveness and the subsequent returns of S P 500 constituents The existing body of literature suggests a prevalent phenomenon known as post earnings announcement drift PEAD challenging the notion of market efficiency According to Fink 2021 there exists an inverse

correlation between PEAD and the size of firms attributed possibly to the heightened trading frictions and worse information environments experienced by smaller companies This study examines the efficacy of ChatGPT in analyzing earnings call transcripts from companies within the Russell 2000 index particularly focusing on smaller firms prone to earnings drift The investment recommendations derived from the analysis serve as a basis for portfolio construction followed by the calculation of returns The increasing integration of AI in finance carries significant implications for further enhancing the efficiency of public markets This trend is likely to accelerate with widespread adoption of APIs provided by prominent financial software companies such as FactSet Bloomberg and S P Capital IQ [LEARN CHATGPT- THE AI SOLUTIONS METHOD BOOK](#)
