Migration Theory Talking Across Disciplines:

Migration Theory Caroline Brettell,James Frank Hollifield,2000 First published in 2000 Migration Theory Caroline B. Brettell,James F. Hollifield,2013-05-13 During the last decade the issue of migration has increased in global prominence and has caused controversy among the host countries around the world Continuing their interdisciplinary approach editors Catherine Brettell and James Hollifield have included revised essays from the first edition in such fields as anthropology political science and history This edition also features new essays by a demographer geographer and sociologist

Migration Michael Samers,Michael Collyer,2016-12-08 While the subject of migration has received enormous attention in academic journals and books across the social sciences introductory texts on the matter are few and far between Even fewer books have explored migration through a critical and explicit engagement with spatial concepts Now in its second edition Migration remains the only text in more than a decade that emphasizes how geographical or spatial concepts can be used critically to understand migration The multi disciplinary text draws on insights from human geography political science social anthropology sociology and to a lesser extent economics All of the chapters focus on key terms theories concepts and issues concerning migration and immigration The book argues that in the context of migration two opposing spatial positions have emerged in the wake of the critique of methodological nationalism On one hand is the significance of transnationalism and on the other the importance of sub national or local processes Both require more nuance and integration while many of the concepts and theories which have thus far neglected space or have not been treated spatially need to be re written with space in mind Pedagogically the text combines a carefully defined structure accessible language boxes that explore case studies of migrant related experiences in particular places annotated suggestions for further reading useful websites and relevant films and summary questions for student learning at the end of each chapter Migration provides a critical multi disciplinary advanced and theoretically informed introduction to migration and immigration Revised and updated with new material new maps and illustrations and an accompanying website <https://migration2ndedition.wordpress.com> it continues to be aimed at advanced undergraduates and Masters level graduate students undertaking courses on migration and immigration

African Migrations Abdoulaye Kane,Todd H. Leedy,2013-02-18 Engaging case studies add to understanding the social processes of voluntary and forced displacement within the continent and across the seas Choice Spurred by major changes in the world economy and in local ecology the contemporary migration of Africans both within the continent and to various destinations in Europe and North America has seriously affected thousands of lives and livelihoods The contributors to this volume reflecting a variety of disciplinary perspectives examine the causes and consequences of this new migration The essays cover topics such as rural urban migration into African cities transnational migration and the experience of immigrants abroad as well as the issues surrounding migrant identity and how Africans re create community and strive to maintain ethnic gender national and religious ties to their former homes

Reseña de "Migration Theory. Talking

across Disciplines", de Caroline Brettel y James Hollifield (editores). María Eugenia Anguiano Téllez,2001 **At Risk**

of Deprivation Jonas Bergmann,2023-10-19 This open access book examines how and why various forms of climate im mobilities can impact people s objective and subjective well being Worsening climate impacts are forcing subsistence farmers worldwide to decide between staying or leaving their homes This mixed methods study analyzes cases of climate related migration displacement relocation and immobility in Peru s coastal highland and rainforest regions The results reveal that numerous farmers experienced profound and often negative well being impacts regardless of whether they stayed or migrated The higher the structural constraints such as weak governance and the more damaging the climate impacts were the higher the risk of well being declines Additionally the affected individuals often had limited agency and ability to mitigate losses These findings challenge the notion of migration as adaptation and emphasize the importance of safeguarding the human rights and security of those affected while addressing loss and damage Without significant investments in such efforts climate impacts could sharply diminish the well being of numerous subsistence farmers worldwide irrespective of whether they stay or migrate Mapping Migration, Identity, and Space Tabea Linhard,Timothy H. Parsons,2018-07-14 This interdisciplinary collection of essays focuses on the ways in which movements of people across natural political and cultural boundaries shape identities that are inexorably linked to the geographical space that individuals on the move cross inhabit and leave behind As conflicts over identities and space continue to erupt on a regular basis this book reads the relationship between migration identity and space from a fresh and innovative perspective

The Bible and Immigration Markus Zehnder,2021-08-12 Questions relating to im migration are among the most heated topics on both sides of the Atlantic Western societies have changed dramatically because of large scale immigration in the last decades Christians are also engaged in the discussion attempting to find direction from the biblical texts Overwhelmingly persons in leading positions both in the secular world and in churches and faith based organizations support the concept of welcoming the stranger The Bible is seen by them as urging us to open the borders as wide as we can In the broader population however reservations remain This book written by a Bible professor who has witnessed mass migration first hand both in Europe and in the U S and who has been a migrant himself for over twenty years attempts to step back and look at the whole of the complex biblical witness instead of cherry picking passages that further a specific agenda It also looks at the salient data on the ground in the fields of psychology demography economy and security data that can no longer be ignored when trying to apply the Bible in a responsible way The book demonstrates the shortcomings of the vast majority of biblical and theological publications on the issue of im migration and presents a comprehensive argument for the use of wisdom and caution and against short sighted and emotionally driven policies supporting open borders **Migration Happens** Katarina Ferro,2006 Migration happens Migration is a global phenomenon that did not just emerge in the 21st century It is perceived by many as a constant source of problems and threats This notion is propagated by politicians among others who use migrants for to further their own

political ideologies Due to economic and security developments globally migration is beset by increasing ethnical conflicts and restrictive immigration policies This in turn creates heightened difficulties for migrants But it also generates new life situations shapes lives and reshapes identities The region of the South Pacific is no exception Considering conflicts in recent years the issue of migration in this area exemplifies the contestation over migration This book provides an overview on migration issues in the South Pacific Issues such as gender the historical aspects and the history of migration in the Pacific migration and conflicts challenges for second generation migrants as well as the situation of Indians after the coup in Fiji are addressed in this volume of the NOVARA Contributions of Research in the Pacific
