Excel and VBA is written by a unique team of finance physics and computer academics and practitioners It is a good reference for those who are studying for a Masters degree in Financial Engineering and Risk Management It can also be useful for financial engineers to jump start a project on designing structured products modeling interest term structure or credit risks Dr Jin Zhang Director of Master of Finance Program and Associate Professor The University of Hong Kong Excel has been one of the most powerful tools for financial planning and computing over the last few years Most users utilize a fraction of its capabilities One of the reasons is the limited availability of books that cover the advanced features of Excel for Finance Professional Financial Computing Using Excel and VBA goes the extra mile and deals with the Excel tools many professionals call for This book is a must for professionals or students dealing with financial engineering financial risk management computational finance or mathematical finance I loved the way the authors covered the material using real life hands on examples Dr Isaac Gottlieb Temple University Author Next Generation Excel Modeling in Excel for Analysts and MBAs *Daily Graphic* Ransford Tetteh,2010-04-13 **Innovations in online teaching and learning** Judah P. Makonye,Nokulunga S. Ndlovu,2023-03-01 This book s research is on online pedagogical approaches devised by teacher educators and researchers to circumvent a face to face curriculum delivery during the COVID 19 pandemic The challenge faced by educators was that they were uncertain of how to use digital technologies in teaching learning and assessment productively This book reports on case studies on teaching student teachers with technology in a way that advanced not only communication but also the cognitive growth of students in relation to disciplinary knowledge The scholars from South African universities used both conceptual and empirical methodologies mostly in qualitative set ups The scholarly contributions in this book are varied They cover theoretical nuances for ICT use in education considerations for the use of computers in the classroom pedagogical thinking and pedagogical integration of ICTs in education affordances of iPads in visible teaching and learning supporting student cognition in Languages Mathematics Science Engineering Graphics and Design with ICTs The use of software applications such as GeoGebra and Excel in teaching and learning mathematics is researched among others The rich discussions that emerged from their research enable academics to learn from others innovative moments that came as a result of pandemic pressure The recommendations in this book can be used in blended learning beyond the COVID 19 era as curriculum delivery methods are bound to change The value of this book is that it reports on pedagogical innovations in using digital technologies in teacher education Researchers have an opportunity to learn from this book how to deal with the tantalising teaching and learning problem of our time How can the use of digital technology transform teaching and learning in general and teacher education in particular *Subject Guide to Books in Print* ,1996 Windows XP Aie Pas W/Cd 0 Ecklund,2002-10 Sustainable governance and management of food systems Eija Vinnari,Markus Vinnari,2023-08-07 This book focuses on the role of governance and management in the food chain These methods are now especially important as the current food system has been found to inflict unsustainable

environmental pressures on our planet. These include but are not limited to greenhouse gas emissions, biodiversity loss, excessive water usage, and problems with nutrient cycles. In addition, issues such as the treatment of farm animals has attracted considerable media and public attention from the ethical point of view. Therefore, the prominent questions discussed in this book are: What are the most important ethical issues in our fisheries, agriculture, and food systems? How should we govern food systems when sustainability is a key goal? What kind of management tools are available for this purpose? Who is responsible for making the agriculture and food system more sustainable?
