Computer Human Interaction Masood Masoodian, Steve Jones, Bill Rogers, 2005-03-01 APCHI 2004 was the sixth Asia Pacific Conference on Computer Human Interaction and was the first APCHI to be held in New Zealand. This conference series provides opportunities for HCI researchers and practitioners in the Asia Pacific and beyond to gather to explore ideas, exchange and share experiences and further build the HCI network in this region. APCHI 2004 was a truly international event with presenters representing 17 countries. This year APCHI also incorporated the 6th SIGCHI New Zealand Symposium on Computer Human Interaction. A total of 69 papers were accepted for inclusion in the proceedings: 56 long papers and 13 short papers. Submissions were subject to a strict double blind peer review process. The research topics cover the spectrum of HCI including human factors and ergonomics, user interface tools and technologies, mobile and ubiquitous computing, visualization, augmented reality, collaborative systems, internationalization and cultural issues, and more. APCHI also included a doctoral consortium allowing 10 doctoral students from across the globe to meet and discuss their work in an interdisciplinary workshop with leading researchers and fellow students. Additionally, five tutorials were offered in association with the conference.

The Flexible Professional in the Knowledge Society Jim Allen, Rolf van der Velden, 2011-06-15

Higher education policy has increasingly gained a European dimension with its own distinct influence over national education policies. Against this background a major project was launched the REFLEX project which aims to make a contribution to assessing the demands that the modern knowledge society places on higher education graduates and the degree to which higher education institutions in Europe are up to the task of equipping graduates with the competencies needed to meet these demands. The project also looks at how the demands and graduates' ability to realise them is influenced by the way in which work is organised in firms and organisations. The REFLEX project has been carried out in sixteen different countries and consisted of a large scale survey among some 70 000 graduates. This report presents the major findings and draws important policy implications.
