This volume has a bold agenda in which academics create immersive worlds where the avatar is the center of the universe As  
the virtual world grows avatars move away from quasi human interactions within virtual domiciles gardens and businesses to  
being blood cells in the blood stream or to be firing neurons in the human brain or creatures competing on the ocean floor or  
the surface of Mars or just about anything that can be imagined using the magic of photographic and artistic images  
programming narrative and avatars What are the frameworks and strategies for building these environments What are the  
things the avatar adapts and learns from in its environment This book will examine such frameworks strategies examples and  
feedback systems to explore what it takes to create a global education environment for learning This starts with engaging
