Natural Wonders Environment In Focus:

Natural Beauty Ronald Moore, 2007-08-28 Natural Beauty was selected for the Choice Outstanding Academic Title list for 2008 Natural Beauty presents a bold new philosophical account of the principles involved in making aesthetic judgments about natural objects It surveys historical and modern accounts of natural beauty and weaves elements derived from those accounts into a syncretic theory that centers on key features of aesthetic experience specifically features that sustain and reward attention In this way Moore's theory sets itself apart from both the purely cognitive and the purely emotive approaches that have dominated natural aesthetics until now Natural Beauty shows why aesthetic appreciation of works of art and aesthetic appreciation of nature can be mutually reinforcing that is how they are cooperative rather than rival enterprises Moore also makes a compelling case for how and why the experience of natural beauty can contribute to the larger project of living a good life
