Naval Electric Weapons The Electromagnetic Railgun And Free Electron Laser:

Naval Electric Weapons Robert E. Williams, 2004-06-01 Theory and simulations of the railgun and free electron laser are presented as well as a suggestion for extending the railgun lifecycle The theory design and analysis of an electromagnetic railgun using a numerical model are discussed The effects of varying electrical pulse formations rail materials and geometries are explored The application of a metallurgical process to mitigate hypervelocity gouging in railgun rails is proposed This concept to delay the onset velocity of gouging by laser peening rails surfaces may significantly increase the velocity at which projectiles acceptably traverse the barrel and extend the useful life of rails If successful this process would apply to any pair of materials in sliding contact at high relative velocity including rocket sled tracks and light gas guns barrels The status of proof of concept tests at LLNL UC Davis and UT is covered FEL simulations investigating the effect that electron beam focal point variations have on the optical mode gain and extraction within the undulator are presented

Hierarchic Electrodynamics and Free Electron Lasers Victor V. Kulish, 2018-09-03 Hierarchic Electrodynamics and Free Electron Lasers Concepts Calculations and Practical Applications presents intriguing new fundamental concepts in the phenomenon of hierarchical electrodynamics as a new direction in physics Concentrating on the key theory of hierarchic oscillations and waves this book focuses on the numerous applications of nonlinear theory in different types of high current Free Electron Lasers FEL including their primary function in the calculation methods used to analyze various multi resonant multi frequency nonlinear FEL models This is considered the first book to Completely and systematically describe the foundation of hierarchical electrodynamics as a new direction of physics Fully represent the physics of high current FEL and associated models from the hierarchic oscillation wave perspective Cover the multi harmonic nonlinear theory of new types of electronic devices such as plasma beam and two stream FEL Formulate and substantiate the concept of cluster femtosecond FEL Analyze practical prospects for a new generation of a global Star Wars strategic defense systems These subjects involve a wide range of disciplines Using numerous real world examples to illustrate information and concepts the book offers a mathematical foundation to explore FEL applications as well as analyze hierarchic plasma like electrodynamic systems and femto second clusters of electromagnetic energy Assembling fragmented concepts from existing literature the author re examines classic approaches in order to develop new insights and achieve scientific breakthroughs **Modeling**

and Simulation of the Free Electron Laser and Railgun on an Electric Naval Surface Platform, 2006 The Free Electron Laser FEL and Rail Gun are electric weapons which will require a significant amount of stored energy for operation These types of weapons are ideal for use onboard an all electric ship An investigation is made of the effects these weapons will have on a proposed electrical system architecture using simulation modeling Specifically this thesis identifies possible design weaknesses and shows where further research and modeling is needed in order to ensure the proper integration of these electric weapons onboard an all electric ship The integration of these electric weapon systems with the power systems

on electric ships will have an impact on naval operations Several scenarios concerning specific naval missions are investigated using simulation software to understand the impact and limitations on the electric system using these new electric weapons
