Naval Reactor Program and Polaris Missile System United States. Congress. Joint Committee on Atomic Energy, 1961
Review of Naval Reactor Program and Admiral Rickover Award United States. Congress. Joint Committee on Atomic Energy, 1959 **The Bluejackets' Manual** Bill Bearden, 1991 Containing information on the US Navy's customs and ceremonies this new edition includes details of the recent technological advances in today's Navy The book has sections covering weapons ships and aircraft training procedures and the code of military justice **National Union Catalog** , 1956 Includes entries for maps and atlases **Naval Engineers Journal** , 1997 **United States Naval Institute Proceedings** , 2003 *Proceedings - United States Naval Institute* United States Naval Institute, 1986 Rickover and the Nuclear Navy Francis Duncan, 1990 No book will ever come closer than this to providing an inside overview of Admiral Hyman G Rickover's nuclear propulsion program The author an Atomic Energy Commission AEC historian assigned to the admiral's office spent years observing the project and its controversial leader in action and the insights he provides here reflect both his familiarity with the subject and his ability to remain an objective observer From 1974 to the day Rickover retired in 1982 Francis Duncan had free access to files documents and personnel at every level of involvement a rare never to be repeated opportunity that most historians dream of but few get And as this book clearly shows he took full advantage of the situation to gain a unique understanding of exactly how the program operated The result is a thorough balanced record of what may well be the U S Navy's and the nation's most important and far reaching project of the twentieth century Knowing that facts and figures alone don't tell the entire story Duncan talked to scores of people who dealt with day to day operations watched men in prototype training and then accompanied them to sea visited civilian and naval installations and had close contact with Rickover himself He also interviewed former U S presidents secretaries of the navy chiefs of naval operations AEC chairmen and legislative leaders who kept tabs on the projects but were removed from daily activities Never once the author says did the admiral attempt to interfere with his research nor did Rickover read the manuscript While the focus here is on the nuclear program not the man this book does provide fascinating insights into Rickover's personality and his efforts to maintain standards of excellence that would assure the program's safety and its ultimate success Using one of the admiral's favorite terms the discipline of technology to demonstrate the method of technological application advocated by Rickover Duncan effectively balances technical detail with astute analysis and even drama Filled with information not found elsewhere his study is a valuable chronicle of the development of submarine propulsion reactors the loss of the Thresher the struggle over the application of nuclear propulsion to surface fleet and the use of the Shippingport Atomic Power Plant to illustrate the feasibility of a light water breeder reactor Catalogue of the Public Documents of the ...
