Risk Perception in Public Health Policies Ibrahim A. Elshaer,Abdalwali Lutfi,Adi Mohammad Alsyouf,Mahmaod I. Alrawad,Kingston Rajiah,Aidi Ahmi,2025-10-14 Public risk perception is a critical factor in determining how policymakers and other decision makers respond to potential risks If the public perceives a particular activity or technology as being high risk policymakers may be more likely to regulate or ban it even if expert assessments suggest that the risks are relatively low This can have important economic and social implications as it may limit innovation and restrict people's choices Public risk perception can influence the adoption of new technologies and public health interventions For example if people perceive a new vaccine or medical treatment as being risky or unsafe they may be less likely to use it even if scientific evidence suggests that it is effective and safe This can undermine efforts to improve public health and prevent the spread of diseases In order to address these issues it is essential to understand how the public perceives different types of risks By identifying the factors that shape public risk perceptions and devising methods to evaluate public risk perception policymakers and other stakeholders can develop more effective risk communication strategies and risk management plans This may involve engaging with the public to address their concerns providing clear and transparent information about risks and benefits and building trust and confidence in new technologies and interventions Ultimately by taking into account the perspectives and concerns of the public decision makers can make more informed and responsible choices about managing risks and promoting public welfare

New Directions in Childhood Studies James M. Curtis,2024-01-04 New Directions in Childhood Studies Innocence Trauma and Agency in the Twenty first Century acknowledges that the conceptual frameworks for understanding the experience of childhood in the twentieth century are no longer adequate and offers important updates to the construct of American childhood The chapters in this collection examine contemporary children's literature film and video games to explore the ways in which everyday realities like trauma disaster and death impact the experience of childhood in America today In many ways the essays show the narratives blur traditional lines between children's and adult content taking children series as subjects while also guiding them through the processes of dealing with the particular challenges Collectively the essays develop a more contemporary construct of the American child and offer new insights into what that construction might mean for contemporary American society and culture

Reviewing the Critics Ben Gifford, Cleveland State University. School of Communication, OhioLINK Electronic Theses and Dissertations Center, 2013 Abstract The purpose of this study is to evaluate the current critical climate in popular online video game reviews i.e. video game criticism written for a general audience So far most of the research published in this area focuses on how the reviews reflect the games themselves rather than strictly examining the content of the reviews in this growing body of literature This study uses computer aided text analysis CATA supplemented with human coding to identify typological differences between film and video game reviews as well as differences in theory usage and critical thought and style Video game reviews are more concerned with the price of the work being reviewed supporting the notion for a utility theory of video games Game reviewers also tend to find redeeming qualities even in very flawed games suggesting they are either overly passionate and/or concerned about keeping advertisers happy Although not at the exceedingly high levels as previous studies the author finds support for using usability heuristics e.g. responsiveness of controls use of in game tutorials to review games Neither body of popular criticism examined delves deeply into theoretical frameworks for auteur or feminist theories but discussion is provided as to how the reviewers could address these issues should they choose to do so
