Natural States The Environmental Imagination In Maine Oregon And The Nation:

Natural States Richard William Judd, Christopher S. Beach, 2003 First Published in 2003 Routledge is an imprint of Taylor Francis an informa company *Natural States* Richard W. Judd, 2010-09-30 Richard Judd and Christopher Beach define the environmental imagination as the attempt to secure a sense of freedom permanence and authenticity through communion with nature The desire for this connection is based on ideals about nature wilderness and the livable landscape that are personal variable and often contradictory Judd and Beach are interested in the public expression of these ideals in post World War II environmental politics Arguing that the best way to study the relationship between popular values and politics is through local and regional records they focus on Maine and Oregon states both rich in natural beauty and environmentalist traditions but distinct in their postwar economic growth *Natural States* reconstructs the environmental imagination from public commentary legislative records and other documents Judd and Beach trace important divisions within the environmental movement noting that they were balanced by a consistent civic minded vision of environmental goods shared by all They demonstrate how tensions from competing ideals sustained the movement contributed to its successes but also limited its achievements In the process they offer insight into the character of the broader environmental movement as it emerged from the interplay of local state and national politics The study ends in the 1970s when spectacular legislative achievements at the national level were masking a decline in mainstream civic engagement in state politics The authors note the rise of the private ecotopia and the increasing complexity in the way Americans viewed their connections with the natural world Yet today despite wide variations in beliefs and lifestyles a majority of Americans still consider themselves to be environmentalists In *Natural States* environmental politics emerges less as a conflict between people who do and do not value nature and more as a debate about the way people define and then chose to live with nature In their attempt to place the passion for nature within a changing political and cultural context Judd and Beach shed light on the ways that ideals unify and divide the environmental movement and act as the source of its enduring popularity *Landscape and the Ideology of Nature in Exurbia* K. Valentine Cadieux, Laura Taylor, 2013-05-07 This book explores the role of the ideology of nature in producing urban and exurban sprawl It examines the ironies of residential development on the metropolitan fringe where the search for nature brings residents deeper into the world from which they are imagining their escape of Federal Express technologically mediated communications global supply chains and the anonymity of the global marketplace and where many of the central features of exurbia very low density residential land use monster homes and conversion of forested or rural land for housing contribute to the very problems that the social and environmental aesthetic of exurbia attempts to avoid The volume shows how this contradiction to live in the green landscape and to protect the green landscape from urbanization gets caught up and represented in the ideology of nature and how this ideology in turn constitutes and is constituted by the landscapes being urbanized **Art, Ecology, and the Resilience of a Maine Island**

Barry A. Logan, Jennifer Pye, Frank H. Goodyear III, 2024-09-03 A richly illustrated catalogue of visual art recording the changing ecology of Monhegan Island a renowned artist destination off the coast of Maine With its rugged shoreline magnificent Cathedral Woods and rustic cedar shingled homes Monhegan Island is quintessential Maine This historic fishing village situated 10 miles off the coast has long been a haven for artists drawn to the splendor of its ocean vistas and picturesque wildlands and for ecologists fascinated by its complex natural history Merging art science and history this book explores the broad arc of ecological events on the island the formation and abandonment of pastureland forest recovery and the critical importance of land conservation through their representation in visual art Indeed for well over a century painters photographers printmakers and cartographers alike have observed and depicted this dynamic landscape Inspired by a Rockwell Kent painting of white spruce saplings set against blue sea and golden sky biologist Barry Logan recognized that the island's ecology could be traced through its artistic depictions across the ages This collaboration between Logan and Monhegan historian Jennifer Pye and art historian Frank Goodyear yields a new and unprecedented survey of the art of the island through the lens of ecology This story of Monhegan parallels that of other land conservation efforts throughout the country yet it is one uniquely well told by island artists ecologists historians and community members **Unlikely**

Environmentalists Paul Charles Milazzo, 2006 Reveals how boosters bureaucrats and engineers not grassroots protesters were truly the ones responsible for spearheading the passage of the Clean Water Act of 1972 How these unlikely protagonists helped to pass the era's most far reaching regulatory law gives us rare insight into how Congress was able to take the lead in addressing those concerns namely in the form of water quality issues *Landscape-scale Conservation Planning* Stephen C. Trombulak, Robert Baldwin, 2010-09-21 Hugh P Possingham Landscape scale conservation planning is coming of age In the last couple of decades conservation practitioners working at all levels of governance and all spatial scales have embraced the CARE principles of conservation planning Comprehensiveness Adequacy Representativeness and Efficiency Hundreds of papers have been written on this theme and several different kinds of software program have been developed and used around the world making conservation planning based on these principles global in its reach and influence Does this mean that all the science of conservation planning is over that the discovery phase has been replaced by an engineering phase as we move from defining the rules to implementing them in the landscape This book and the continuing growth in the literature suggest that the answer to this question is most definitely no All of applied conservation can be wrapped up into a single sentence what should be done the action in what place at what time using what mechanism and for what outcome the objective It all seems pretty simple what where when how and why However stating a problem does not mean it is easy to solve *Choice*, 2004 *Preserving the Nation* Thomas R. Wellock, 2007-04-17 This renamed environmental movement focused less on efficient use of resources and more on creating healthy ecosystems and healthy people free of risks from pollution and hazardous wastes By 1970 environmentalism enjoyed widespread popular support and bipartisan appeal What

all three movements always shared was a common recognition of the limits of America's natural resources and environment a belief in preserving them for generations to come and a faith in at least some government environmental action rather than relying purely on private solutions Not only does the history of these movements bring to light much about the expanding role of government in environmental regulation and the growth of the modern American state but a look at environmental campaigns over the course of the twentieth century reveals a great deal about the racial gender and class divisions at work in the ongoing efforts to preserve the environment

Maine History, 2007 **Resources**, 2001 *Barry Commoner and the Science of Survival* Michael Egan, 2007 Chronicles the activist career of Barry Commoner one of the most influential American environmental thinkers and his role in recasting the environmental movement after World War II For over half a century the biologist Barry Commoner has been one of the most prominent and charismatic defenders of the American environment appearing on the cover of Time magazine in 1970 as the standard bearer of the emerging science of survival In *Barry Commoner and the Science of Survival* Michael Egan examines Commoner's social and scientific activism and charts an important shift in American environmental values since World War II Throughout his career Commoner believed that scientists had a social responsibility and that one of their most important obligations was to provide citizens with accessible scientific information so they could be included in public debates that concerned them Egan shows how Commoner moved naturally from calling attention to the hazards of nuclear fallout to raising public awareness of the environmental dangers posed by the petrochemical industry He argues that Commoner's belief in the importance of dissent the dissemination of scientific information and the need for citizen empowerment were critical planks in the remaking of American environmentalism Commoner's activist career can be defined as an attempt to weave together a larger vision of social justice Since the 1960s he has called attention to parallels between the environmental civil rights labor and peace movements and connected environmental decline with poverty injustice exploitation and war arguing that the root cause of environmental problems was the American economic system and its manifestations He was instrumental in pointing out that there was a direct association between socioeconomic standing and exposure to environmental pollutants and that economics not social responsibility was guiding technological decision making Egan argues that careful study of Commoner's career could help reinvigorate the contemporary environmental movement at a point when the environmental stakes have never been so high

Internationale Bibliographie der Rezensionen wissenschaftlicher Literatur, 2004 **The Wisdom of Small Farms and Local Food** John Edward Carroll, 2005 This book presents the theory the teachings of Aldo Leopold and the values and the practice context of agrarian thought It further analyzes the programmatic efforts of four selected land grant universities including those at Wisconsin Iowa Maine and Vermont with a practical eye toward the application of these lessons

Down East, 2004 *The Romantic Vision of Michael Brophy* Rock Hushka, 2005 Explores the intersections of history forest ecology and the rich tradition of landscape painting **Twentieth-century New England Land**

Conservation Charles H. W. Foster, 2009 Written by and about New Englanders this book is relevant to those attempting to address conservation problems on a regional basis The stories here are of people using what they had setting to work to remedy conditions and doing so successfully At a time of growing concern for the environment their story will inspire new conservation leaders Reconstructing Conservation Ben A. Minter, Robert E. Manning, 2003-10 Focusing not just on the tensions that have marked the deconstructivist debate over wilderness and environmentalism this book represents a larger and ultimately more constructive discussion over the proper course of future conservation scholarship and action *Library Journal* Melvil Dewey, Richard Rogers Bowker, L. Pylodet, Charles Ammi Cutter, Bertine Emma Weston, Karl Brown, Helen E. Wessells, 2004 Includes beginning Sept 15 1954 and on the 15th of each month Sept May a special section School library journal ISSN 0000 0035 called Junior libraries 1954 May 1961 Also issued separately **Land Economics** , 1948
