programming In addition to paying these high rates they often have to put up with annoying advertisements disrupting their viewing pleasure This book shows free and inexpensive alternatives with fewer advertisements or none at all Other people when their computer slows to a crawl will take their computer to a repair shop and pay tens to hundreds of dollars getting it back up to speed This book shows people how to do it quickly and easily themselves using programs already installed on the computer or available on line for free Some people spend tens of dollars per computer per year to protect their computer against malicious software This book tells how and where to go to do it for free Many computer users spend hours of frustrating searches on the Internet looking for diagnostic and optimization tools to speed up their computers or to make them more reliable In many cases they will come across websites featuring products that claim to do what they want However once they go through the trouble of downloading installing and using the software the software performs the job as advertised at least up to a point The software will tell them what is wrong and will have a fix it or optimize button When the user clicks the button he or she will see a notice that the software must be registered before the action is performed Registration usually involves the payment of money This book will show the users which programs truly do it for free Using this book will save the reader many hours of searching downloading and installing programs only to find a demand of payment The author has done the research and legwork to find the free gems that will help the reader This book will also show the user how to use a GPS device or application to avoid speed traps and automated ticketing cameras and where to download the required data Saving the cost of just one ticket will cause this book to pay for itself many times over These are just a few of many examples of money savers that can be found in this book
