House of Commons - Transport Committee: Local Authority Parking Enforcement - HC 118 Great Britain: Parliament: House of Commons: Transport Committee, 2013-10-23 The use of parking charges and fines specifically to raise revenue by local authorities is neither acceptable nor legal. Annual parking accounts would allow the public to see how much local revenue is derived from the enforcement of fines and what proportion of this comes from on or off street parking charges. It's right that parking charges be determined locally but hard to justify fines that substantially exceed penalties for more serious offences like speeding. DfT's statutory guidance should stipulate that local authorities implement a grace period of 5 minutes after the expiry of paid for time on any paid parking before enforcement officers issue a Penalty Charge Notice PCN. The Guidance should be clarified and updated particularly in relation to rules for loading and unloading. A 25% penalty charge discount should also be introduced for motorists who pay within 7 days of losing any appeal to a parking tribunal. Local authorities currently offer a 50% discount if motorists pay their penalty charge within 14 days but this is not available to motorists who appeal to a tribunal. Motorists should also not have to appeal against PCNs where tribunal adjudicators have repeatedly identified a problem such as poor signage. Adjudicators should also be given powers to allow appeals where local authorities fail to follow statutory guidance concerning the use of cameras. While businesses cannot be completely exempt from parking restrictions local authorities must also ensure that the need to restrict parking and manage congestion does not stifle the ability of businesses to trade and help grow the economy.
