 Matthew N. Eisler,2022-12-06 The electric vehicle revival reflects negotiations between public policy which promotes clean  
 fuel efficient vehicles and the auto industry which promotes high performance vehicles Electric cars were once as numerous  
 as internal combustion engine cars before all but vanishing from American roads around World War I Now we are in the  
 midst of an electric vehicle revival and the goal for a sustainable car seems to be within reach In Age of Auto Electric  
 Matthew N Eisler shows that the halting development of the electric car in the intervening decades was a consequence of  
 tensions between environmental energy and economic policy imperatives that informed a protracted reappraisal of the  
 automobile system These factors drove the electric vehicle revival argues Eisler hastening automaking s transformation into  
 a science based industry in the process Challenging the common assumption that the electric vehicle revival is due to the  
 development of better batteries Age of Auto Electric instead focuses on changing environmental and socioeconomic  
 conditions energy and environmental policies systems of energy conversion and industrial production and innovation  
 practices that affected the prevalence and popularity of electric vehicles in recent decades Eisler describes a world in  
 transition from legacy to alternative energy conversion systems and the promises compromises new problems and  
 unintended consequences that enterprise has entailed      Stereophile ,1998
