Many think that they understand the secrets to the success of the biggest tech companies Facebook Amazon Apple Netflix
and Google It s the platform economy or network effects or some other magical power that makes their ultimate world
domination inevitable Investment banker and professor Jonathan Knee argues that the truth is much more complicated but
entrepreneurs and investors can understand what makes the giants work and learn the keys to lasting success in the digital
economy Knee explains what really makes the biggest tech companies work a surprisingly disparate portfolio of structural
advantages buttressed by shrewd acquisitions strong management lax regulation and often encouraging the myth that they
are invincible to discourage competitors By offering fresh insights into the true sources of strength and very real
vulnerabilities of these companies *The Platform Delusion* shows how investors existing businesses and startups might value
them compete with them and imitate them *The Platform Delusion* demystifies the success of the biggest digital companies in
sectors from retail to media to software to hardware offering readers what those companies don t want everyone else to
know Knee s insights are invaluable for entrepreneurs and investors in digital businesses seeking to understand what drives

intermediaries between creator and consumer technological connectivity is changing the very definition of competition In the
new network economy disintermediation and granularity are turning cooperative information gathering and sharing into a
vital market institution To exemplify the effects of communication technology Bhatt focuses on two markets with particularly
powerful effects on the economy labor and education and CIME communication information services media and
entertainment Mobile connectivity is radically changing the extent capabilities and operations of these markets both in terms
of the services they provide and how they interact with consumers Bhatt also explores how these benefits intersect with new
concerns about privacy and security when the line between public and private information is becoming ever more fluid
