students Reform ideas traditional ideas and original ideas are combined in this text that is designed to teach concepts and
computations especially intuitive ones about the geometry of 3 space The core concepts of multivariable calculus are
presented in a straightforward but never simplistic language that will familiarize students with the thinking and speaking
habits of mathematicians and ease their access to the mathematics of applications and higher mathematics courses Students
are engaged through formulas and geometric reasoning In addition to calculating accurately students are asked to draw
accurately in both two and three dimensions reason geometrically from figures make estimates based on ruler and pencil
constructions and present their results verbally Helps students learn conceptual reasoning and reinforces learning by asking
students to work the material in two different modes This is a spiral bound text Lays flat so students can draw in blank
diagrams while reading the text A multitude of exercises are interwoven within the flow of the text T Subject Guide to
