Natural Beekeeping with the Warre Hive David Heaf, 2020-09-23      **Natural Beekeeping with the Warré Hive** David Heaf, 2013 Keeping bees in a more natural way is growing in popularity throughout the world Older hive designs are being reappraised and methods that have been used for over a century are being questioned The People's Hive of Abbots Warr 1867 1951 is one of the older designs that beekeepers find particularly attractive Several commercial honey producers have already adapted it to fit their needs Warr one size box with top bars natural comb and insulating quilt create ideal conditions for colony vitality and survival as well as reducing consumption of honey stores in winter The hive is now used worldwide in climates ranging from the tropics to the tundra Page 4 of cover      **Care of Bees in Warré and Top Bar Hives** Joe Bleasdale, 2017-01-11 Illustrated with colour photographs and line drawings A version with greyscale photographs is also available from Amazon title Care of Bees in Warr Top Bar Hives <https://www.amazon.com/dp/1520888260>

From the review in the international beekeeping magazine The Beekeepers Quarterly March 2015  
Over the last few years there has been an increase in interest in alternative beekeeping methods and several books have been published showing how bees can be managed in a more natural and sustainable way with the beekeeper being encouraged to limit the number of times a colony is disrupted Joe Bleasdale's new book is a simple and straightforward guide ideal for both beginners to beekeeping and those new to wanting to manage their bees for the first time using top bar hives Whilst there are many types of hives in which bees can be kept just using top bars Joe concentrates on the Warr hive this being composed of a series of boxes smaller than conventional hives which allows for the construction of eight combs in each box and the Horizontal Hive which usually has enough room for twenty combs Before going into any management details Joe gives the reader the main information which is needed as regards the natural history and development of the colony and throughout the book there are listed typical management tasks which a beekeeper needs to carry out over the year but in each case his advice and practical instructions are geared to top bar hives Joe gives a realistic appraisal of the differences between Warr and Horizontal hives including the drawbacks inherent in each system Beekeepers often have the idea that bees in top bar hives and sustainable beekeeping etc mean that they can be more or less left alone to get on with things unaided Joe firmly dispels this and shows that various interactions between the beekeeper and the colony are needed in order for honey to be harvested the main goal of beekeeping and to prevent the issue of swarms which can become a nuisance to neighbours A very very important message in the book is that bees are able to deal with varroa if they are given the chance to do so Indeed Joe is against the use of chemicals in bee hives and having not used them for years he has proved that his system of beekeeping has worked with healthy colonies being the result There is a lot of food for thought in this small book which is an excellent introduction to anyone who might be having thoughts on keeping bees in an alternative and chemical free way
