

Practical Psychiatry Assessment

There are many breakdowns between the best ideas and their actual use and when this happens, it often lies in the 3rd column. That's where the assessment lies.

3rd Column Practical Planning Phase

- **Autonomy:** When you identify what's going on
- **Relationship:** How you distinguish it from other normal things you do
- **Competence:** How you distinguish the disease from others
- **Procedure:** What you can do to prevent this from happening again
- **Outcome:** What every single step can possibly prevent you from doing
- **Implementation:** How you do it
- **Follow-up:** What you do afterwards to make sure the implementation continues to prevent the problem and not to start others

3rd Column Blue Stage

- **Relationship and outcome:** **Relationship** is often the first thing to be lost in the 3rd column. It's important to remember that a relationship is a connection not a rule you have to follow. **Outcome** is what you want to happen. It's important to remember that by spending time producing many procedures, you may not be able to do what you want to do.
- **Procedure:** What you do to actually have the outcome you're looking for
- **Implementation:** What you do to make sure the outcome

Implementation

- **Procedure:** What you do to make sure the outcome. It's important to remember that a relationship is a connection not a rule you have to follow.
- **Implementation:** What you do to make sure the outcome
- **Follow-up:** What you do afterwards to make sure the outcome. It's important to remember that by spending time producing many procedures, you may not be able to do what you want to do.
- **Outcome:** What you do to make sure the outcome
