Ching, Mark Mulville, 2014-02-10 The first European edition of Francis DK Ching's classic visual guide to the basics of building construction. For nearly four decades the US publication *Building Construction Illustrated* has offered an outstanding introduction to the principles of building construction. This new European edition focuses on the construction methods most commonly used in Europe, referring largely to UK Building Regulations overlaid with British and European while applying Francis DK Ching's clear graphic signature style. It provides a coherent and essential primer presenting all of the basic concepts underlying building construction and equipping readers with useful guidelines for approaching any new materials or techniques they may encounter. *European Building Construction Illustrated* provides a comprehensive and lucid presentation of everything from foundations and floor systems to finish work. Laying out the material and structural choices available, it provides a full understanding of how these choices affect a building's form and dimensions. Complete with more than 1000 illustrations, the book moves through each of the key stages of the design process from site selection to building components, mechanical systems and finishes. Illustrated throughout with clear and accurate drawings that effectively communicate construction processes and materials. Provides an overview of the mainstream construction methods used in Europe. Based around the UK regulatory framework, the book refers to European level regulations where appropriate. Manufacturers' literature offers little assistance during the selection process as well as being biased in favor of a particular product. The first guide devoted exclusively to the subject *The Manual of Below Grade Waterproofing Systems* picks up where manufacturers' manuals leave off. Written by an architect with more than twenty years of experience designing habitable underground spaces, it provides frank unbiased appraisals of various waterproofing materials and systems. This manual presents architects and engineers with expert guidance on selecting, designing with and specifying waterproofing materials and systems. Justin Henshell walks you step by step through the entire waterproofing process from determining waterproofing needs to selecting and specifying waterproofing systems to preparing detailed drawings for construction documents. And throughout he offers architectural details which illustrate general design principles as well as high quality photographs of waterproofing failures that help you to more clearly comprehend common design errors and

problems associated with various waterproofing materials The Manual of Below Grade Waterproofing Systems is an indispensable working resource for architects civil engineers contractors specifiers materials manufacturers landscape architects and all other professionals involved with the design and construction of habitable underground spaces
