Ncs 2014 Business Studies June Test 2014:

Assessing Academic Literacy in a Multilingual Society Albert Weideman, John Read, Theo du Plessis, 2020-11-02

South African universities face major challenges in meeting the needs of their students in the area of academic language and literacy. The dominant medium of instruction in the universities is English and to a much lesser extent Afrikaans but only a minority of the national population are native speakers of these languages. Nine other languages can be media of instruction in schools which makes the transition to tertiary education difficult enough in itself for students from these schools. The focus of this book is on procedures for assessing the academic language and literacy levels and needs of students not in order to exclude students from higher education but rather to identify those who would benefit from further development of their ability in order to undertake their degree studies successfully. The volume also aims to bring the innovative solutions designed by South African educators to a wider international audience.

Common Core Dilemma—Who Owns Our Schools?

Mercedes K. Schneider, 2015. In her new book, bestselling author Mercedes Schneider provides little known details about the history of the Common Core State Standards. She lifts the veil on how the Common Core was developed, who was present in the back room, the push to copyright it so that test makers could profit, and the urgency for governors to sign commitments before the standards were even completed. CCSS is publicized as being a state-led teacher-developed approach guaranteed to ensure that all students are college and career ready. By the end of this eye-opening book, readers will come to understand the CCSS and its attendant assessments as something very different: an education-restricting profit-garnering opportunity packaged as an education-sounding sales pitch. Common Core Dilemma will appeal to readers across the political spectrum who want to better understand the role of corporations, nonprofits, big donors with strings attached, and the federal government in exercising control in our schools. Mercedes Schneider is the right person to take a close look at the controversies around the Common Core. She is not only a high school teacher but also holds a Ph.D. in research methods and statistics. No one digs deeper than she to understand the politics, money, and personalities behind big issues. Diane Ravitch, professor of education at New York University, historian of education, and bestselling author of *Reign of Error*. The Common Core state standards swept the nation in an educational coup d'état six years ago. The campaign was so swift that most Americans indeed most educators had never even heard of the standards when they were adopted. Mercedes Schneider has become the nation's leading detective investigating this whodunnit mystery, and here she tells the tale from the beginning. Anthony Cody, educator, writer, and public speaker.
