

books developed by the NCERT and the state level agencies have the potential to ensure learners' mental and emotional involvement in the learning of these subjects.

2.2 Science and Mathematics Resource Centre (SMRC)

In order to develop the skills of observation, experimentation and inferring among prospective teachers, they ought to be prepared in such a way that they themselves are trained in the above skills and are able to direct their teaching towards development of these skills in themselves and in their students. In order to design effective teaching-learning strategies for achieving the above goal, they need a place in their institution where they can find material, equipment and other teaching aids for designing the effective 'Teaching Learning Material' (TLM) for use during practice teaching programme. Further, a student teacher is also required to innovate or design activities which are in tune with the socio-cultural milieu of their students, apart from the activities given in the text-books. Thus, besides material, he needs a place, where environment is conducive for the preparation of the required TLM.

2.3 Functions of Science and Mathematics Resource Centre

Science and Mathematics Resource Centre is expected to perform the following functions:

- Providing space and material to student teachers for hands-on experience with science and mathematics learning material.
- Providing the teacher-educators and student teachers material and equipments for demonstration, experimentation and other related activities.
- Providing opportunities to teacher educators to demonstrate process skills.
- Providing a place equipped with necessary resources to stimulate thinking leading to development of innovative teaching learning material.
- Providing a place to store/exhibit the TLM prepared by student teachers and teacher educators.

2.4 Material and Equipments

While acquiring the necessary material and equipments, it should be kept in mind that the Science and Mathematics Resource Centre (SMRC) in a teacher education institution is different from a science or mathematics laboratory in a school. Here, all the student teachers are not supposed to perform the same activity at the same time as different students may be preparing teaching learning material to teach different topics to different classes in their own way at a time of their choice. Thus, while procuring material, few sets of each equipment required for performing an activity will be enough, whereas the material/equipment required for preparing Teaching Learning material will be needed in quantity to be determined by the number of users.
