Building Successful Online Communities Robert E. Kraut,Paul Resnick,2012-03-23 How insights from the social sciences including social psychology and economics can improve the design of online communities Online communities are among the most popular destinations on the Internet but not all online communities are equally successful For every flourishing Facebook there is a moribund Friendster not to mention the scores of smaller social networking sites that never attracted enough members to be viable This book offers lessons from theory and empirical research in the social sciences that can help improve the design of online communities The authors draw on the literature in psychology economics and other social sciences as well as their own research translating general findings into useful design claims They explain for example how to encourage information contributions based on the theory of public goods and how to build members commitment based on theories of interpersonal bond formation For each design claim they offer supporting evidence from theory experiments or observational studies

**Community 101** Robyn Tippins,Miranda Marquit,2010 Making an online community that grows and survives isn't easy It takes planning vision and dedication Most companies aren't prepared to invest the time and manpower it takes to make it happen and when their communities fail to prosper they blame it on chance But chance doesn't play a part in whether or not you respond to your community's needs Successful online communities don't just happen but with proper care and feeding your company can build a community that surpasses all of your expectations If you are kind to the people who make up your community you'll gain a sold out customer base and your business will be the beneficiary of increased sales increased loyalty and increased customer satisfaction This book isn't intended to tell you what a community is it will explain what a company can gain from a great online community and it will give you the education and tools you need to make it happen This book is for anyone who wants to build a fantastic online community From Product Managers to Executives from Entrepreneurs to Evangelists anyone can make their company's community thrive Community management isn't about trickery or contests but about treating your community's members as if they matter to you After reading this book you have no excuse not to build your own thriving online community

### **Preventing Harmful Behaviour in Online**

**Communities** Zoe Alderton,2022-04-11 Preventing Harmful Behaviour in Online Communities explores the ethics and logistics of censoring problematic communications online that might encourage a person to engage in harmful behaviour Using an approach based on theories of digital rhetoric and close primary source analysis Zoe Alderton draws on group dynamics research in relation to the way in which some online communities foster negative and destructive ideas encouraging community members to engage in practices including self harm disordered eating and suicide This book offers insight into the dangerous gap between the clinical community and caregivers versus the pro anorexia and pro self harm communities allowing caregivers or medical professionals to understand hidden online communities young people in their care may be part of It delves into the often unanticipated needs of those who band together to resist the healthcare community suggesting practical ways to address their concerns and encourage healing Chapters investigate the alarming ease with which ideas of self harm can infect people through personal contact community unease or even fiction and song and the potential of the internet to transmit self harmful ideas across countries and even periods of time The book also outlines the real nature of harm based communities online examining both their appeal and dangers while also examining self censorship and intervention methods for dealing with harmful content online Rather than pointing to punishment or censorship as best practice the book offers constructive guidelines that outline a more holistic approach based on the validity of expressing negative mood and the creation of safe peer support networks making it ideal reading for professionals protecting vulnerable people as well as students and academics in psychology mental health and social care

### **Design and**

**Implementation of Online Communities** Michael Del Grosso,2001-09-01 There are many claims that building an online community on the Internet is the next big thing for online businesses to enhance their bottom line Advertising has been the biggest moneymaker on the Internet so far so attention is money on today s Internet The idea of an online community is to build communication tools into a website to allow visitors to interact with each other and encourage them to return often By providing visitors with a place to interact with others and talk about their interests companies can better target them with

advertising Certainly a web site that brings users back over and over again is very appealing to any organization that is trying to sell goods or get their message heard But the building of an online community is not as simple as just adding discussion forums and or chat rooms to a web site In fact many believe that a successful community is only 10% dependent upon technology and 90% dependent upon people This thesis takes a look at the principles of successful online communities according to current literature and then analyzes the application of these principles on some popular online communities It then takes a detailed look at PRESENCE Lite an online community built by the author based on the principles of online communities

### **Ecology of Online Communities**

Nathan E. TeBlunthuis,2021 How do competitive struggles for resources or symbiotic relationships that support a web of interdependent communities shape the evolution of online organizing Most prior studies of online community success have focused almost exclusively on communities internal features but in biology and organization studies ecological approaches have shown that success is largely and sometimes overwhelmingly a function of what others groups are doing This dissertation contributes to the fields of Human Computer Interaction Social Computing and Communication an ecological analysis that accounts for the complex dynamic interactions between communities and their environments and is important for understanding the successes and failures of online communities The theoretical foundations are in organizational ecology a vast social scientific literature that applies ecology to human organizations Online communities are

very different from classical organizations so this investigation required empirically validating basic assumptions about when online communities will be competitive or mutualistic. It uses linear and nonlinear time series analysis of clusters of online communities to show that mutualistic relationships are more common than competitive ones. Interviews with members of overlapping online communities empirically support and explain this widespread mutualism in terms of tensions between the types of benefits of participating in online communities. Instead of resolving these tensions using a complex organization that provides the full range of benefits, people build multiple relatively simple communities, each specializing in a subset of benefits. Designers of platforms for online communities should cultivate ecosystems of overlapping and differentiated communities by supporting resource sharing and simultaneous participation in many communities.
