Promoting Inclusion in Education Abroad Nick J. Gozik, Heather Barclay Hamir, 2023-07-03 Co-published with While education abroad including studying, volunteering, researching and interning abroad is increasingly emphasized as a critical factor in preparing undergraduates for a globally interconnected world, diversifying the pool of participants in such activities has proven challenging. Framed within the concept of inclusive excellence with the objective of promoting diversity, inclusion and equity in higher education as foundational to educational excellence, the contributors present research and practices that have been proven successful in improving participation among groups of students traditionally underrepresented in education abroad. Broader participation in education abroad programming has been a perennial concern at numerous higher education institutions in the U.S. having prompted countless discussions in professional organizations and across campuses among faculty, staff and students. Many have come to recognize that overseas opportunities are no longer a luxury and instead are a necessity for job seekers entering a more diverse, globally interconnected workplace. The volume offers a combination of research based chapters and case studies from leading experts on the barriers that disproportionately impact specific groups of students including students with disabilities, first generation college students, undocumented students, racial and ethnic minorities, science, technology, engineering and mathematics (STEM) majors and males. The authors illuminate the issues which may inhibit education abroad participation from individual to institutional and present strategies reflecting a

broad range of institutional contexts resources and needs While there has been significant discussion and action to promote broader inclusion in education abroad this is the first volume focusing on research and practice to achieve these ends and is intended as a critical resource for practitioners and scholars alike *Guide to Environment and Development* Institute of Development Studies (Brighton, England),1998 The information gap regarding quality mailing telephone the type of information available The CD ROM information and or Internet location are given This Guide also offers guidelines on how to use the Internet **Guide to the GATs:An Overview of Issues for Further Liberalization of Trade in Services** World Trade Organization.
