the symbolic embedded within a remarkable and original theory of practice is a nodal aspect of the work of Pierre Bourdieu who was a leading social thinker of our times 1930 2002 Against the backdrop of the significance of symbolic practice in social life this book explains the intellectual warp and woof of his theory of the symbolic presents a brief excursus that explores its potential to illuminate social contexts other than those in which it was conceived examines its links with Bourdieu's role of social critic and public intellectual and engages critically with scholarly assessments of his contribution

*Affect Theory, Shame, and Christian Formation* Stephanie N. Arel,2016-11-08 This book addresses the eclipse of shame in Christian theology by showing how shame emerges in Christian texts and practice in ways that can be neither assimilated into a discourses of guilt nor dissociated from embodiment Stephanie N Arel argues that the traditional focus on guilt obscures shame by perpetuating the image of the lonely sinner in guilt Drawing on recent studies in affect and

attachment theories to frame the theological analysis the text examines the theological anthropological writings of Augustine and Reinhold Niebuhr the interpretation of empathy by Edith Stein and moments of touch in Christian praxis Bringing the affective dynamics of shame to the forefront enables theologians and religious leaders to identify where shame emerges in language and human behavior The text expands work in trauma theory providing a multi layered theological lens for engaging shame and accompanying suffering

**Morphing Intelligence** Catherine

Malabou,2019-02-12 What is intelligence The concept crosses and blurs the boundaries between natural and artificial bridging the human brain and the cybernetic world of AI In this book the acclaimed philosopher Catherine Malabou ventures a new approach that emphasizes the intertwined networked relationships among the biological the technological and the symbolic Malabou traces the modern metamorphoses of intelligence seeking to understand how neurobiological and neurotechnological advances have transformed our view She considers three crucial developments the notion of intelligence as an empirical genetically based quality measurable by standardized tests the shift to the epigenetic paradigm with its emphasis on neural plasticity and the dawn of artificial intelligence with its potential to simulate replicate and ultimately surpass the workings of the brain Malabou concludes that a dialogue between human and cybernetic intelligence offers the best if not the only means to build a democratic future A strikingly original exploration of our changing notions of intelligence and the human and their far reaching philosophical and political implications Morphing Intelligence is an essential analysis of the porous border between symbolic and biological life at a time when once clear distinctions between mind and machine have become uncertain
