

I Believe In My Passion

"Aut inveniam viam aut faciam", the famous quote from Hannibal Barca, which translates to 'I shall either find a way or make one', has been my philosophy in life. Although I didn't study economics, in my high school, I was always passionate about it. Economics offers various different learning opportunities. It is an amazingly versatile subject, where there's always something more to learn and understand. I believe, a person should have at least a basic understanding of economics, to become an aware citizen. In order to expand my views on economics, I read quite a few books. "Small is Beautiful" by E.F Schumacher was one of my initial books on economics. What excites me the most about this particular book is that Schumacher had predicted many of the issues we as a planet are now facing, such as reliance on imports and exports, the energy crisis, issues with oil consumption and dual economies in developing countries. The text is insightful and intellectual whilst still being to-the-point and easy to read. This book is regarded of the best reads for economics because, rather than suggesting particular solutions, this influential book offers principles to guide strategies. Furthermore, Economics has 3 broad categories, Microeconomics, Macroeconomics and Econometrics. To have basic knowledge on these, I read books by Dr S K Agarwala on Microeconomics and Macroeconomics, and the book "Basic Econometrics" by Damodar N Gujarati, which gives an comprehensive view on Econometrics. Another way I try to get to know more about the subject is by watching online videos. The animations help in visualising the economic techniques and laws. They provide real life scenarios and increase the practical learning. They covered topics such as Supply, demand, Inflation, bubbles and tulips, fiscal policy and stimulus, recession, hyperinflation and stagflation, etc. The reason I'm so fascinated by economics is that Mathematics is an integral part of it. Mathematics is one of my favourite subjects, because of the logic and analytics involved in it. Mathematics and statistics are like, resolving challenges and the reward is, personal satisfaction. Whenever I work hard on a complex problem, and solve it, the sense of achievement I get from it, is unparalleled. I was an active participant in the Mathematics Olympiad in my school days, even winning some of them at school level. Mathematics made me find logic behind anything and everything happening around me giving me a new perspective to look at things. Along with Math, I find finance quite fascinating. To understand how Money is so important in our life, and all the policies that govern the flow of it makes me want to explore more about it. I fancy taking Leadership roles in life. I was the House captain in my school and led my house to various wins in intra school competitions. Communicating effectively with group members is one of the greatest strength I possess. Taking part in Model United Nations, Badminton district level competitions, etc also helped me to grow as a person. Working with the World Wide fund (WWF), Willing Hearts (soup kitchen), and The Singapore Zoo as a volunteer, has taught me the need to be...

Passion Robert J. Vallerand, 2015 In *The Psychology of Passion* Robert J. Vallerand provides a complete presentation of the Dualistic Model of Passion and reports on the empirical evidence supporting the theory. Vallerand highlights the effects of two types of passion: harmonious and obsessive, on a number of psychological phenomena such as cognition, emotions, performance, relationships, aggression, and violence. *Handbook of Eudaimonic Well-Being* Joar Vittersø, 2016-10-18 This handbook presents the most comprehensive account of eudaimonic well-being to date. It brings together theoretical insights and empirical updates presented by leading scholars and young researchers. The handbook examines philosophical and historical approaches to the study of happy lives and good societies and it critically looks at conceptual controversies related to eudaimonia and well-being. It identifies the elements of happiness in a variety of areas such as emotions, health, wisdom, self-determination, internal motivation, personal growth, genetics, work, leisure, heroism, and many more. It then places eudaimonic well-being in the larger context of society, addressing social elements. The most remarkable outcome of the book is arguably its large-scale relevance, reminding us that the more we know about the good way of living, the more we are in a position to build a society that can be supportive and offer opportunities for such a way of living for all of its citizens. **Victoria**

University of Wellington Law Review , 1988 **Existential Utopia** Michael Marder, Patricia Vieira, 2011-11-24 Radical political thought of the 20th century was dominated by utopia, but the failure of communism in Eastern Europe and its disavowal in China has brought on the need for a new model of utopian thought. This book thus seeks to redefine the concept of utopia and bring it to bear on today's politics. The original essays contributed by key thinkers such as Gianni Vattimo and Jean-Luc Nancy highlight the connection between utopian theory and practice. The book reassesses the legacy of utopia and conceptualizes alternatives to the neo-liberal technocratic regimes prevalent in today's world. It argues that only utopia, in its existential sense, grounded in the lived time and space of politics, can distance itself from mainstream ideology and not be at the service of technocratic regimes while paying attention to the material conditions of human life. *Existential Utopia* offers a new and exciting interpretation of utopia in contemporary culture and a much-needed intervention into the philosophical and political discussion of utopian thinking that is both accessible to students and comprehensive. *Harvard Law Review* , 1985

The Passions of Modernism Anthony Cuda, 2010 This title offers an alternative approach to modernism as confronting helplessness and passivity Upending the traditional view of modernism as defined by elitism skepticism and emotional detachment Anthony Cuda argues that there is another view beneath this facade one that emphasizes modernism s deep commitment to understanding human vulnerability powerlessness and the unpredictable energies of passion In *The Passions of Modernism* Cuda explores how four modernist writers T S Eliot W B Yeats Virginia Woolf and Thomas Mann conceptualize passion how they dramatize its upheavals and illuminations and how it affects their ideas about the creative act Resuscitating the classical definition of passion from the Latin passio to be moved or to be acted on Cuda s study suggests that the modernist attraction to passivity arises from a desire to gauge the limits of the active mind and to rethink psychology

aesthetics and theories of creativity from the perspective of the moved instead of the mover Focusing on well known texts as well as uncollected and archival materials Cuda sheds new light on four canonical writers by examining their work in terms of passion scenes vivid intense tropes situated somewhere between exhilaration and terror that recur with insistent regularity over an artist s entire career exerting an unusual psychological force on the creative mind that conjures them
