*Passive Microwave Remote Sensing of the Earth* Eugene A. Sharkov, 2003-12-16 This book represents the most comprehensive description of the physical foundations of methods and instruments in the fields of passive remote sensing applied to investigations of the Earth Solar system bodies and space Emphasis is placed on the physical aspects necessary to judge the possibilities and limitations of passive remote sensing methods in specific observation cases Numerous practical applications and illustrations are given referring to airspace up to date experiments Due to the lack in traditional separation on methods and instruments of remote sensing of the Earth and outerterrestrial space this book aims to supply more information in this field

**Passive Microwave Remote Sensing of the Earth** Fuzhong Weng, 2017-07-14 This book covers the fundamentals of satellite microwave instrument calibration remote sensing sciences and algorithms as well as the applications of the satellite microwave observations in weather and climate research

**Microwave Radiometry and Remote Sensing of the Earth's Surface and Atmosphere** P. Pampaloni, S. Paloscia, 2023-06-14 This book contains a selection of refereed papers presented at the 6 Specialist Meeting on Microwave Radiometry and Remote Sensing of the Environment held in Florence Italy on March 15 18 1999 Over the last two decades passive microwave remote sensing has made considerable progress and has achieved significant results in the study of the Earth s surface and atmosphere Many years of observations with ground based and satellite borne sensors have made an important contribution to improving our knowledge of many geophysical processes of the Earth s environment and of global changes The evolution in microwave radiometers aboard satellites has increased steadily over recent years At the same time many investigations have been carried out both to improve the algorithms for the retrieval of geophysical parameters and to develop new technologies The book is divided into four main sections three of these are devoted to the observation of the Earth s surface and atmosphere and the fourth to future missions and new technologies The first section deals with the study of sea and land surfaces and reports recent advances in remote sensing of ocean wind sea ice soil moisture and vegetation biomass including electromagnetic modelling and the assimilation of radiometric data in models of land surface processes The following two sections are devoted to the measurement of atmospheric quantities which are of fundamental importance in climatology and meteorology and since they influence radio wave propagation they also impact on several other fields including geodesy navigational satellite and radioastronomy The last section presents an overview of new technologies and plans for future missions

Pampaloni, Choudhury, Kerr, Njoku, 2023-05-31 Recent advances in theory and observations using passive microwave remote sensing have highlighted the potential of spaceborne sensors for contributing to the required land surface measurements of soils vegetation snow cover and precipitation Furthermore the spatial resolution of passive microwave observations matches the special scales of large scale models of land atmosphere interactions both for data assimilation and validation In order to

stimulate and focus this research a workshop sponsored by ESA and NASA was organized to review the state of the art in microwave radiometry related to land applications and to exchange ideas leading into new directions for future research This volume contains the refereed papers from the aforementioned ESA NASA workshop which are arranged by topic as well as the edited working group reports Passive Microwave Remote Sensing of Land--Atmosphere Interactions Bhaskar J. including detection capabilities This book is intended for postgraduate students and professionals working in fields related to remote sensing geography oceanography civil environmental and geotechnical engineering *Advances in Passive Microwave Remote Sensing of Oceans* Victor Yu Raizer, 2024-08 This new edition introduces the fundamentals of passive microwave remote sensing of oceans including the physical principles of microwave radiometry novel observational data their interpretation and applications It not only demonstrates and examines the recent state of the art of microwave data but also provides guidance for explaining complex ocean studies and advanced applications All chapters are thoroughly updated with detailed analysis of space based microwave missions and a new chapter on space based microwave radiometer experiments has been added The power of microwave remote sensing is discussed as a tool for the diagnostics of ocean phenomena in research and education Earth Resources , 1977 **Remote Sensing of the Earth's Surface** Vincent Victor Salomonson, 1989 Three sections geological studies of the Earth's surface crust and lithosphere using spaceborne technology Symp 2 recent results from the SPOT and Landsat Thematic Mapper investigation programs Mtg A3 and microwave observations of snowpack and soil properties Workshop I **Spectrum Management for Science in the 21st Century** National Research Council, Division on Engineering and Physical Sciences, Board on Physics and Astronomy, Committee on Radio Frequencies, Committee on Scientific Use of the Radio Spectrum, 2010-03-25 Radio observations of the cosmos are gathered by geoscientists using complex earth orbiting satellites and ground based equipment and by radio astronomers using large ground based radio telescopes Signals from natural radio emissions are extremely weak and the equipment used to measure them is becoming ever more sophisticated and sensitive The radio spectrum is also being used by radiating or active services ranging from aircraft radars to rapidly expanding consumer services such as cellular telephones and wireless internet These valuable active services transmit radio waves and thereby potentially interfere with the receive only or passive scientific services Transmitters for the active services create an artificial electronic fog which can cause confusion and in severe cases totally blinds the passive receivers Both the active and the passive services are increasing their use of the spectrum and so the potential for interference already strong is also increasing This book addresses the tension between the active services demand for greater spectrum use and the passive users need for quiet spectrum The included recommendations provide a pathway for putting in place the regulatory mechanisms and associated supporting research activities necessary to meet the demands of both users **Passive Microwave Remote Sensing of Land Surface Parameters** Aniruddha Guha, 2002 *Microwave Indices from Active and Passive Sensors for Remote Sensing Applications* Emanuele Santi, Simonetta Paloscia, 2019-10-21 Past research has comprehensively assessed the capabilities of satellite sensors operating at microwave frequencies both active SAR scatterometers and passive radiometers for the remote sensing of Earth's surface Besides brightness temperature and backscattering coefficient microwave indices defined as a combination of data collected at different frequencies and

polarizations revealed a good sensitivity to hydrological cycle parameters such as surface soil moisture vegetation water content and snow depth and its water equivalent The differences between microwave backscattering and emission at more frequencies and polarizations have been well established in relation to these parameters enabling operational retrieval algorithms based on microwave indices to be developed This Special Issue aims at providing an overview of microwave signal capabilities in estimating the main land parameters of the hydrological cycle e g soil moisture vegetation water content and snow water equivalent on both local and global scales with a particular focus on the applications of microwave indices
