eternal beings that move from life to another in different place and time As perpetual spirits we come across bodily existence on Earth in a series of persona and physical bodies On a spiritual level we choose every lifetime as a way to learn the lessons we've to head off for ourselves Exploring our life in the past through a therapy for apparently inexplicable physical or mental issues is known as Past Life Regression Therapy It works together with beliefs of reincarnation and takes us back in earlier life to get a better understanding of our life we live in the present In this book we will tell you everything you need to know

about Past Life Regression and how you can even perform it on yourself without the help of a hypnotherapist **AMT Conference Manual 2003** Alex Kent,Susan Courtney,2003-06 Contains papers from workshops presented at the Third European Energy Therapies Conference held in August 2003 The AMT is at the forefront of education and information about the new Energy Psychology and Meridian and Energy Therapies approaches In August 2003 an extraordinary group of people met to learn and share their knowledge expertise and energies at the Third European Energy Therapies Conference The manual contains papers from workshops presented at the conference giving readers the opportunity to learn the latest in this exciting field and share the flavour of this gathering **Operating Manual for Enlightenment** Lincoln Stoller,2024-11-01 This book is not offering enlightenment it's describing it The enlightened mind unites intellect and emotion despite their separation being built into the structure of our brains This split appears in the mythic division between our lower and higher natures and the separation of mind and body Intellect and emotion function in concert As color and shape are to vision one complements the other When fully integrated they cannot be taken apart The topics in the book's first half lean toward the intellectual The second half looks at the division from the emotional side What we are separating with one hand we are putting together with the other Struggle We naturally consider our problems as different from ourselves We see them in our environment and rely on our skills and insights to resolve them Our intellectual solutions address one aspect of these problems while our emotions address another Are these problems to be solved or processes to be understood What should we do if our problems are inside us Mind Your state determines your readiness arousal and self reflection Your state of mind orients your thinking how you can feel about yourself and who you're able to be Equally important are thoughts you're not likely to have or cannot have at all This book is about the states of mind that support focus awareness thoughts and feelings It's not a guide to solving problems it's an explanation of how you see State With our state of mind we gather our thoughts and focus our attention Focus without a state is like a telescope with no one to look through it In order to focus first take full responsibility for all you think and feel The properties of your state determine what you're capable of One state of mind is not enough because you cannot understand the world from one point of view Your future is determined by your range of states of mind Wisdom Alternate states of mind support understandings we don't have They may be logical emotional spiritual or evanescent They could involve knowledge spread across generations so that no one generation has the complete picture We might call them prophetic inspired psychedelic or delusional Larger states of mind develop with experience but they're not defined by the facts they hold One needs a state of mind that can accommodate contradictions without generating conflict Instantaneous Enlightenment Change does not happen instantly but epiphanies feel instantaneous The reason is simple a new state is a whole rearrangement of one's previous conception There are no halfway states to total rearrangement Many pieces need to fall into place before we can make ourselves into something new We are at a watershed moment in our understanding of the mind after which psychology will change Instead of focusing on thoughts and behavior we are coming to
