This book covers the most important topics related to patents and patent applications, gives you a step-by-step roadmap of patent prosecution, and also explains the international patent applications as well as the recent changes that the America Invents Act brought.

United States Government Information, 1994 *Academic Entrepreneurship* Michele Marcolongo, 2017-08-30 The pathway to bringing laboratory discoveries to market is poorly understood and generally new to many academics. This book serves as an easy-to-read roadmap for translating technology to a product launch, guiding university faculty and graduate students on launching a start-up company. Addresses a growing trend of academic faculty commercializing their discoveries, especially those supported by the National Science Foundation and National Institutes of Health. Offers faculty a pathway and easy-to-follow steps towards determining whether their discovery idea, technology, is viable from a business perspective, as well as how to execute the necessary steps to create and launch a start-up company. Has a light-hearted and accessible style of a step-by-step guide to help graduate students, post-docs, and faculty learn how to go about spinning out their research from the lab. Includes interviews by faculty in the disciplines of materials science, pharmaceuticals, medical devices, information technology, energy, and mechanical devices, offering tips and discussing potential pitfalls to be avoided.
