Vols for 1964 have guides and journal lists    *Hemodialysis, Vascular Access, and Peritoneal Dialysis* Access Claudio Ronco,Nathan W. Levin,2004 Recent developments have spurred a renewed interest in novel solutions to access the patient circulation mainly concentrating on vascular access for renal replacement therapies and on peritoneal dialysis access Starting with the epidemiology the focus then shifts to the evolution of new techniques and monitoring procedures with regard to hemodialysis which are discussed and evaluated Attention is also paid to the new biomaterials available concentrating on their improved biocompatibility and surface characteristics As developments in the field of peritoneal dialysis have taken a similar turn new devices providing access to the peritoneal cavity which have recently been made available are introduced next Last but not least the management of complications and the continuous maintenance and care of the access with regard to both hemodialysis and peritoneal dialysis are highlighted This book provides a complete

Akoh,Nadey S. Hakim,2001 The incidence of treated end stage renal disease ESRD continues to rise particularly in the western world Although renal transplantation is the treatment of choice for ESRD the decline in the number of cadaveric organs coupled with the rising demand for transplantation means that an increasing number of patients will have to depend on dialysis Vascular or peritoneal access is the Achilles heel of any dialysis service This book offers a clear description of the state of the art in providing and preserving a durable and reliable access It also points the way to dialysis in the 21st century The contributing authors are drawn from a wide background with expertise in various aspects of dialysis access including its history the technique of placement anaesthesia radiology nursing care and training of vascular access surgeons There is currently a dearth of books on the subject of dialysis access The few existing books on vascular access were written in the United States with none from the UK This volume is intended for use by transplant surgeons general surgeons with an interest in vascular access vascular surgeons nephrologists trainees and nurses Dialysis services are expanding worldwide and this book is an invaluable guide for those involved in daily patient care and organisation of dialysis services ***Dialysis Access Management*** Steven Wu,Sanjeeva Kalva,Harold Park,Chieh Suai Tan,Gerald A. ***Dialysis Access*** Richard James Gray,Jeffrey J. Sands,2002 ***Dialysis Access A Multidisciplinary Approach*** gives radiologists nephrologists and surgeons the complete knowledge base they need to deliver effective coordinated care to dialysis patients with vascular access needs This practical guide explains how to implement the National Kidney Foundation's Dialysis Outcomes Quality Initiative DOQI guidelines for vascular access and details procedures for creating vascular access monitoring access failure treating blocked access and inserting and using catheters Dr Gray is the lead author for the Society of Cardiovascular and Interventional Radiology SCVIR's Dialysis Access Reporting Standards International contributors are expert interventional radiologists nephrologists and vascular access surgeons ***Dialysis Access A Multidisciplinary Approach*** fully integrates these specialties perspectives ***Remote Patient Management in Peritoneal Dialysis*** Claudio, Ronco,Carlo, Crepaldi,Mitchell H.,

Rosner,2019-04-08 Telemedicine and remote patient monitoring are innovative tools to provide remote transmission interpretation and storage of data for review by the care team. These tools allow for accurate home monitoring of patients enabling the team to improve care through prevention and early identification of problems. This book is structured into four main parts. The first describes the evolution of peritoneal dialysis and related technology. The second part summarizes current unmet clinical needs reported by patients and care teams, the need for innovation in the field and the technical and clinical issues involved with the modern management of peritoneal dialysis. The third section presents the operational characteristics of the new information communication technology system and in detail the features of the Sharesource platform. Finally a series of field experiences by expert users are reported to describe the benefits and the potential applications of remote patient monitoring in the future. Telemedicine and remote patient monitoring have proven to be useful in the care of patients on peritoneal dialysis. The scope of this publication therefore is to present the experiences of clinical key opinion leaders who have been using the application.
