**Official Gazette of the United States Patent and Trademark Office**, 2003 **Threshold** Heather Suzanne Woods, 2024-05-15 Smart homes are domestic spaces outfitted with networked technology made by brands like Google Facebook Amazon and Apple However Silicon Valley purveyors are not the only important actors in smart home development Appliance makers logistics companies health and wellness conglomerates insurance companies and security franchises are all betting on the smart home in an economy that puts a premium on data Together major players in the smart home space have successfully attracted the attention and pocketbooks of millions of households by touting the virtues of ambient networked technologies as an upgrade to modern domestic life If industry predictions hold nearly half of American houses will be smart by 2024 Yet what it means to be smart is still unsettled Threshold asks and answers the question How do smart homes communicate cultural values about the role of technology in the 21st century Answering this question is time sensitive as the coming years will determine how smart homes are configured who has access to them and what they mean to their owners policy makers technology companies and others invested in these domestic digital platforms The consequences of these decisions are significant because they impact both smart home residents and society at large At present much of the research on smart homes caters either to industry experts or scientists and engineers This literature often describes or evaluates the technical capacities of the smart home or focuses on user interface and design Instead Heather Woods argues we need a sustained cultural analysis of smart homes that considers the socio technical variables gender class income disparity race criminal justice the housing market and the future of both labor and domesticity that give the smart home

meaning Threshold takes up this challenge from a rhetorical perspective arguing that smart homes are lived material embodiments of the digital cultures in which they are imagined built and used Those considerations more often than not are relegated to secondary considerations when in truth they are the most pervasive and consequential factors affecting anyone participating in a smart home ecosystem Woods argues that smart homes are spatial manifestations of a phenomenon called living in digitality a cultural condition whereby users engage with technology at every moment of every day Using extensive fieldwork at smart homes throughout the USA Woods traces how smart homes urge ubiquitous computing as a normalized daily practice readying domestic spaces and their occupants for an increasingly transactional digital future that is largely controlled by corporate interests Threshold advances knowledge in three ways by 1 Offering definitional tools for identifying and evaluating immersive technologies including but not limited to the smart home 2 Identifying three distinct configurations of the smart home according to their domestic and technological functions 3 Demonstrating the productive capacity of smart homes and smart devices to influence social life The book highlights the rhetorical force of smart domesticity for rhetorical scholars digital humanists political scientists critical theorists policy makers and residents or prospective residents of smart homes Ultimately Threshold serves as a toolkit for recognizing and responding to the persistent encroachment of digital technologies in all parts of our lives

## **Handbook of Research on Inclusive and Innovative Architecture and the Built Environment** Peng, Ng

Foong, Sonet, Ungku Norani, 2023-06-19 There is an urgent need to emphasize inclusivity in architecture and the built environment. Innovative technologies within the field of architecture are being developed to enhance inclusivity in architectural approaches and development processes. It is essential to research inclusivity in architecture and the built environment toward holistic sustainable development. The Handbook of Research on Inclusive and Innovative Architecture and the Built Environment discusses inclusive and innovative approaches to providing socio cultural value within architecture and the built environment. It focuses on issues of diversity, sustainability, resilient designs, and more. Further, the book expands the knowledge and awareness of architecture and the built environment towards inclusivity in design development and emerging advanced technology. Covering topics such as architectural challenges, global health, and urban morphology, this major reference work is an excellent resource for architects, government officials, urban planners, practitioners, students, and educators of higher education, researchers, and academicians.

[Artificial Intelligence to Solve Pervasive Internet of Things Issues](#) Gurjit Kaur, Pradeep Tomar, Marcus Tanque, 2020-11-18 Artificial Intelligence to Solve Pervasive Internet of Things Issues discusses standards and technologies and wide ranging technology areas and their applications and challenges including discussions on architectures, frameworks, applications, best practices, methods, and techniques required for integrating AI to resolve IoT issues. Chapters also provide step by step measures, practices, and solutions to tackle vital decision making and practical issues affecting IoT technology including autonomous devices and computerized systems. Such issues range from adopting, mitigating, maintaining, modernizing, and protecting AI and IoT infrastructure components such as scalability, sustainability, latency, system decentralization, and maintainability. The book enables readers to explore, discover, and implement new solutions for integrating AI to solve IoT issues. Resolving these issues will help readers address many real world applications in areas such as scientific research, healthcare, defense, aeronautics, engineering, social media, and many others. Discusses intelligent techniques for the implementation of Artificial Intelligence in Internet of Things. Prepared for researchers and specialists who are interested in the use and integration of IoT and Artificial Intelligence technologies.

**American Home**, 1949 [The Energy Wise Home](#) Jeff Dondero, 2017-05-19 When picking out a home there are a number of aspects to keep in mind: location, size, and layout. One issue that many people neglect is energy conservation, which is quickly becoming one of the most important aspects of modern life. How do you make your home energy wise? Where do you start? What aspects of home living can affect and be affected by our energy choices? This task can be momentous and intimidating. *The Energy Wise Home: Practical Ideas for Saving Energy, Money, and the Planet* makes it easy. Jeff Dondero walks you through your home's walls, doors, windows, and roof, room by room, and appliance by appliance, breaking them down into simple terms so that you can make the smartest energy and resource choices possible. He even covers gardens and garages, explaining what household items cost to run, how to conserve energy when using them, giving guidance on what's

sustainable and what isn't This encyclopedic manual is very helpful for understanding the machine that is your house and how to keep it maintained and running well and green while saving you money This guide is a great fit to make sure that you make the best of your home and the resources that power and run it Conservation in the home is something that you owe to yourself your family and your planet    **The Voice Catchers** Joseph Turow,2021-05-18 Your voice as biometric data and how marketers are using it to manipulate you Only three decades ago it was inconceivable that virtually entire populations would be carrying around wireless phones wherever they went or that peoples exact locations could be tracked by those devices We now take both for granted Even just a decade ago the idea that individuals voices could be used to identify and draw inferences about them as they shopped or interacted with retailers seemed like something out of a science fiction novel Yet a new business sector is emerging to do exactly that The first in depth examination of the voice intelligence industry The Voice Catchers exposes how artificial intelligence is enabling personalized marketing and discrimination through voice analysis Amazon and Google have numerous patents pertaining to voice profiling and even now their smart speakers are extracting and using voice prints for identification and more Customer service centers are already approaching every caller based on what they conclude a caller's voice reveals about that person's emotions sentiments and personality often in real time In fact many scientists believe that a person's weight height age and race not to mention any illnesses they may have can also be identified from the sound of that individual's voice Ultimately not only marketers but also politicians and governments may use voice profiling to infer personal characteristics for selfish interests and not for the benefit of a citizen or of society as a whole Leading communications scholar Joseph Turow places the voice intelligence industry in historical perspective explores its contemporary developments and offers a clarion call for regulating this rising surveillance regime
