O BRAVE 'NEW NORMAL' WORLD: Living with Coronavirus Steve Gleadhill, 2025-10-14 It is ironic that having spent several thousand years subjugating all other life forms so we could become the dominant species, we have wilfully ceded our hard-won authority over our fellow animals to inanimate technology. In many cases, we have become so blindly reliant on machines that we have stopped using our own wits to the point where our brains are becoming dangerously redundant. We hardly need to think for ourselves at all. This vacuous mentality that we seem to be embracing is pervading all aspects of our behaviour and society. The rise of AI that now exceeds our own intelligence raises new ethical and existential dilemmas. As we develop synthetic minds, we will need to weigh up how we design them, what we allow and don't allow them to do, and crucially how to ensure their needs are aligned with our own. Meanwhile, humanity is waging a suicidal war on the natural world according to secretary-general of the UN Antonio Guterres, which also ultimately jeopardises our very existence. *The Official Xbox Magazine*, 2007

I Series Stephen Haag, James T. Perry, Amy Phillips, 2002 The *I Series Applications* textbooks strongly emphasize that students learn and master applications skills by being actively engaged by doing. These texts have been written with clear, error-free and unambiguous steps to accomplish tasks that lead to a finished document, worksheet, or database table. The authors made the decision that teaching how to accomplish some task is not enough for complete understanding and mastery. Prior to introducing steps, the authors discuss why the steps students are about to experience are important and what role the steps play in the overall plan for creating a document, workbook, or database.
