The New Deal

The New Deal was a series of programs and policies implemented in the United States during the 1930s in response to the Great Depression. Initiated by President Franklin D. Roosevelt, the New Deal aimed to provide relief for the unemployed, recover the economy, and reform the financial system to prevent future depressions.

The New Deal consisted of two main phases: the first New Deal (1933-1934) and the second New Deal (1935-1938). The first New Deal focused on immediate relief and economic recovery through various initiatives, such as the Civilian Conservation Corps (CCC) and the Public Works Administration (PWA), which created jobs and improved infrastructure.

The second New Deal introduced more ambitious reforms, including the Social Security Act, which established a safety net for the elderly and unemployed. This phase also strengthened workers' rights through the National Labor Relations Act, which supported unionization.

The New Deal had a significant impact on American society, reshaping the relationship between the government and the economy. It expanded the role of the federal government in economic affairs and laid the groundwork for future social welfare programs.

Critics of the New Deal argued that it increased government intervention in the economy and raised taxes. However, supporters believed it was essential for recovery and provided vital assistance to millions of Americans.

This book distills everything into one trusted, easy-to-follow resource written for real Mac users, not engineers.
