

DIVE TABLES

TABLE 1 - END-OF-DAY LETTER COUNT

TABLE 2. SOURCE LISTING TIME DISTRIBUTION

DIVE PLANNING WORKSHEET

TERMS AND ABBREVIATIONS USED IN DIVE PLANNING

Repetitive Dive – Any dive made less than 24 hours after a previous dive.

ADT = Actual Dive Time - The time from the moment of descent until returning to the surface.

Letter Group - A letter symbol for the amount of Residual Nitrogen remaining in the body from previous dives.

SIT - Surface Interval Time - The time spent at the surface between dives.

RNT - Residual Nitrogen Time - The nitrogen remaining in the body from a meal or meal which will be used 24 hours.

AMDT – Adjusted Maximum Dive Time –
The maximum Dive Time for the depth of
a dive minus the PHT.

TNT - Total Nitrogen Tolerance - The sum of PNT and ADT. This figure is used to obtain a letter group after negative dives.

10 of 10

- Consider all dives made shallower than 40/12m as 40' dives.
- On any dive, ascend no faster than one foot every two seconds (30'/min per minute).
- For maximum dive time, make all repetitive dives shallower than your previous dive.

Naui Dive Table

Michael A. Lang, Walter C. Jaap

Nauí Dive Table:

The NAUI Textbook, 1987 **Jeppesen's Open Water Sport Diver Manual** Glen H. Egstrom, Lou Fead, 1992 This full color extensively illustrated revision of a highly respected dive manual includes the information necessary to learn open water diving. Timely discussion include ecology and scuba techniques equipment and safety materials women's diving issues and concerns expanded CPR information air sharing and hand signals *Jeppesen's Advanced Sport Diver Manual* Richard A. Clinchy, 1993 This bestselling full color manual includes thoroughly updated coverage of all aspects of sports diving including equipment safety and diving techniques. Current diving standards are reflected in its discussions on beach diving computer equipment CPR diving accident management and mixed gas diving NAUI News, 1987 **Scuba Diving** Jack Jackson, 2000 The essentials of diving fully illustrated The science of diving equipment training dive planning safety types of diving **The Essentials of Deeper Sport Diving** John Lippmann, 1992 Physiological and practical considerations of scuba diving in easy to read format The Scuba Diving Handbook Paul McCallum, 1991 Guide to scuba diving in both fresh and salt water with information for divers at all levels Adventures in Scuba Diving National Association of Underwater Instructors (U.S.), 1994-12 Sources, 1993 **Aquatic Rescue and Safety** Dennis Graver, 2004 This title provides detailed information on how to identify treat and prevent all types of submersion injuries from drowning hypothermia and cramps to injuries of the heart lungs head and spinal cord. Special sections deal with watercraft related and scuba diving injuries **Deeper Into Diving** John Lippmann, 1990 **Bends Explained** Jeffrey H. Rudell, 2009-07 Details about many of the divers that I evaluated are included with comments on the way their dives got them into trouble and the chamber at City Island NAHC I discuss their treatment profiles and the results of their treatment. It presents a larger series of bent divers than any I am aware of. Should you find another comparable series contact me at avoidaccidents.ymail.com Ideas about bends have changed from the concept that a bubble formed in the nervous system because of a rapid ascent or the joint by cavitation negative pressure. Rapid ascent or joint motion caused the culprit to appear and pressure would make the bubble go away. Now we are focused on treating tissue damage with oxygen. But we are still using pressure and oxygen to increase the partial pressure of oxygen in the affected tissue. The treatment of choice is the 5 hour long U.S. Navy Treatment Table 6 which washes out the nitrogen in the tissue and washes in the oxygen. Careful understanding of how my patients got bent and how they responded should make any diver more cautious regarding repetitive diving and a multi day series of dives. Pressure at the deepest part of the dive washes in the nitrogen over time. Fatty tissue that includes the central nervous system and peripheral nerves absorbs more nitrogen than watery tissues such as muscle. Shaping up to dive includes weight loss abstinence during the duration of the series of dives and improving lung function. Physical conditioning prevents tachycardia a rapid heart beat during exertion. A program of regular exercise two or three times a week prevents early fatigue during prolonged exertion or increases stamina. Exercise such as walking 20 or more minutes a day for several weeks before diving

is as important as paying for the trip Swimming accustoms one to buoyancy relaxing in the water and adjusting temperature regulating reflexes such as vaso constriction in the skin on immersion Dive accidents sometimes do not have a treatable solution Most accidents resolve after one re compression breathing oxygen under pressure Many patients were treated multiple times and some did not get complete relief of their symptoms and or neurological findings Immediate therapy traditionally is in water re compression which has its drawbacks It is difficult to administer and hypothermia fatigue and drowning are risks Surface On Deck oxygen breathing from a face mask or immediate re compression in a chamber are always effective treatments Transport to a facility has logistical problems and the destination chamber may not be functional when it is needed The U S Navy Diving Manual Rev 6 Vol 5 20 4 4 2 1 has procedures for In Water Re compression using AIR 20 4 4 2 2 In Water Re compression Using Oxygen Both sections advise going to 30 fsw and additional instructions for decompressing If oxygen is used and the decompression has been completed then 3 hours of oxygen breathing is the procedure One cylinder of oxygen and a face mask are good for one diver for 3 hours Where are the other cylinders for other divers The book is about the chamber that I personally operated and staffed I was almost continually available The number of bent divers that I treated not all are included in the book because they were routine speaks for itself AAA Avoid An Accident Plan Safe Dives *Proceedings of the American Academy of Underwater Sciences Biomechanics of Safe Ascents Workshop* ,1990 **Southern California Diver's Log** ,1983 **Diving for Science...1989** Michael A. Lang,Walter C. Jaap,1989

Dive Training ,2004 **Skin Diver: Vol.32: No.5** ,1983 **Pressure** ,1990 *Sport Scuba Diving in Depth* Tom Griffiths,1991 A text on the theory and practice of safe scuba diving *Technical Diving in Depth* B. R. Wienke,2001

Whispering the Secrets of Language: An Emotional Journey through **Naui Dive Table**

In a digitally-driven earth wherever displays reign great and instant transmission drowns out the subtleties of language, the profound strategies and mental nuances concealed within words frequently go unheard. However, nestled within the pages of **Naui Dive Table** a interesting literary prize sporting with raw feelings, lies a fantastic quest waiting to be undertaken.

Composed by a talented wordsmith, this wonderful opus attracts visitors on an introspective journey, gently unraveling the veiled truths and profound influence resonating within ab muscles cloth of each and every word. Within the emotional depths with this touching evaluation, we shall embark upon a heartfelt exploration of the book is core styles, dissect its charming publishing fashion, and fail to the effective resonance it evokes deep within the recesses of readers hearts.
