**William H. Brownfield, Building Owners
and Managers Association**

Office Buildings Guide:

Office Buildings Guide Dallas Chamber of Commerce, 1978 **Office Buildings** Thomas Arnold, 2002 With some 70 international examples the authors and editors show how the new issues facing architects can be resolved Thematic contributions by experts in various disciplines discuss topics such as models of work organisation fa ade technology climatic regulation lighting etc This volume is a crucial standard work in the design of offices A Small-business Guide ,1997

Green Office Buildings William D. Browning, 2005 Extremely practical this book reveals how to develop an environmentally sustainable office building in a cost effective way Not only does it teach about the business case for green buildings but it also explains the nuts and bolts of site planning design sustainable construction facilities management financing and leasing and government policies and trends *Office Buildings* Canada. Office of Energy Efficiency, 1999

The Escalation Handbook for Office Buildings William H. Brownfield, Building Owners and Managers Association, 1998-01-01 Specically tailored to the escalation process this book takes away a lot of the confusion associated with it Divided into tow sections The Concepts and The Preparation that Comprises the Escalation Process Development of Thermal Envelope Design Guidelines for Federal Office Buildings Andrew K. Persily, 1990 Office building envelopes are generally successful in meeting a range of structural aesthetic and thermal requirements However poor thermal envelope performance will occur when there are discontinuities in the envelope insulation and air barrier systems such as thermal bridges and air leakage sites These discontinuities result from designs that do not adequately account for heat air and moisture transmission with many thermal defects being associated with inappropriate or inadequate detailing of the connections of envelope components Despite the existence of these thermal envelope performance problems information is available to design and construct envelopes that do perform well In order to close the gap between available knowledge and current practice the Public Buildings Service of the General Services Administration has entered into an interagency agreement with the Center for Building Technology of the National Institute of Standards and Technology to develop thermal envelope design guidelines for federal office buildings The goal of this project is to transfer the knowledge on thermal envelope design and performance from the building research design and construction communities into a form that will be used by building design professionals This report describes the NIST GSA envelope design guidelines development at the end of the first year of effort on the project The effort to this point has consisted of a literature review of research results and technical information on thermal envelope performance and design an assessment of existing design guidelines as they relate to the thermal envelope and the development of a format and outline for the design guidelines Commercial Office Buildings Best Practice Guide ,2008 This best practice guide contains tips and tools for improving energy efficiency in existing commercial office buildings Just as no two buildings are identical no two owners will undertake the same energy management program The tools provided illustrate some of the most innovative strategies and technologies as well as some

of the most successful case studies Learning from these stories of success owners and managers are encouraged to explore the many resources listed throughout the guidebook for more detailed information *Best Practices Guide for High-Performance Indian Office Buildings*, 2013 Guide to the Design of Post Office Buildings, 1976* Building Type Basics for Office Buildings A. Eugene Kohn, Paul Katz, 2002-07-29 Building Type Basics books provide architects with the essentials they need to jump start the design of a variety of specialized facilities In each volume leading national figures in the field address the key questions that shape the early phases of a project commission The answers to these questions provide instant information in a convenient easy to follow format The result is an excellent hands on reference that puts critical information at your fingertips **An Architect's Guide for Sustainable Design of Office Buildings** R. Cole, 1999

Metric Handbook David Adler, 1999 Originally devised as a guide for converting from imperial to metric measurements The Metric Handbook has since been totally transformed into a major international handbook of planning and design data The second edition has been completely updated with most chapters being totally rewritten to meet the needs of the modern designer The book contains nearly 50 chapters dealing with all the principal building types from airports factories and warehouses offices shops and hospitals to schools religious buildings and libraries For each building type The Metric Handbook gives the basic design requirements and all the principal dimensional data Several chapters deal with general aspects of building such as materials lighting acoustics and tropical design There are also sections on general design data including details of human dimensions and space requirements It is a unique authoritative reference for solving everyday planning problems In its various editions it has sold over 100 000 copies worldwide and continues to be a reference work belonging on every design office desk or drawing board THE source of information to solve your everyday planning problems Easy to use provider of all data needed for the job Keeps you up to date with all the latest information *The Commercial directory of Liverpool, and shipping guide [afterw.] The Commercial directory and shippers' guide [afterw.] Fulton's commercial directory and shippers' guide*, 1879 General Construction Cost Review Guide for Federal Office Buildings, 1997 **Benefits Guide** Cathy Higgins, Jennifer Roberts, New Buildings Institute, Clare Feighan, 2004-09-01 **Planning Office Space** Francis Duffy, Colin Cave, John Worthington, 2016-06-06 **Planning Office Space**

Guide to Natural Ventilation in High Rise Office Buildings Antony Wood, 2017-07-11 Tall buildings are not the only solution for achieving sustainability through increased density in cities but given the scale of current population shifts the vertical city is increasingly being seen as the most viable solution for many urban centers However the full implications of concentrating more people on smaller plots of land by building vertically whether for work residential or leisure functions needs to be better researched and understood It is generally accepted that we need to reduce the energy equation in both operating and embodied terms of every component and system in the building as an essential element in making it more sustainable Mechanical HVAC systems Heating Ventilation and Air Conditioning in tall office buildings typically account for 30 40

percent of overall building energy consumption The increased efficiency or possibly even elimination of these mechanical systems through the provision of natural ventilation could thus be argued to be the most important single step we could make in making tall buildings more sustainable This guide sets out recommendations for every phase of the planning construction and operation of natural ventilation systems in these buildings including local climatic factors that need to be taken into account how to plan for seasonal variations in weather and the risks in adopting different implementation strategies All of the recommendations are based on analysis of the research findings from richly illustrated international case studies Tried and tested solutions to real life problems make this an essential guide for anyone working on the design and operation of tall buildings anywhere in the world This is the first technical guide from the Council on Tall Buildings and Urban Habitat s Tall Buildings and Sustainability Working Group looking in depth at a key element in the creation of tall buildings with a much reduced environme

A Design Manual Rainer Hascher, Simone Jeska, Birgit Klauck, 2002 Offices as a category of building have probably faced more challenges and undergone more dramatic changes in the last few years than most other kinds of buildings Here the authors show how the new issues facing architects can be solved
