Renewable Energy Soufiane Haddout, Priya Krishnamoorthy Lakshmi, Antonio Mubango Hoguane, 2023-02-15 Renewable energy is energy that is collected from renewable resources that are naturally replenished on a human timescale Renewable energy includes sources such as sunlight tides waves wind rain and geothermal heat According to BP s 2018 Energy Outlook EO renewable energy will be the fastest growing source of energy increasing fivefold by 2040 thus providing around 14% of global primary energy at this future point On the other hand climate change is bringing about rising temperatures which have significant negative impacts on humans and the environment and transitioning to renewable energy sources such as biofuels can help meet this challenge Transitioning to renewable energy and reducing reliance on fossil fuels is one way to help slow down the effects of climate change While renewables used to be a more expensive option new clean energy technologies are lowering costs and helping to move economies away from fossil fuels The 1st International Conference on Climate Change and Ocean Renewable Energy CCORE 2022 is a virtual conference held from November 4 7 2022 presenting experiences and ideas through research talks and presentations from diverse fields in climate change and ocean renewable energy This event offers a platform in bringing together a forum for students postdocs and established scientists to exchange their ideas and contribute to an integrative approach to climate change and ocean renewable energy EURO-PAR '... ,2004

American Journal of Physics ,2005 **Exploring Signature Pedagogies** Regan A. R. Gurung, Nancy L. Chick, Aeron Haynie, 2023-07-03 From the Foreword These authors have clearly shown the value in looking for the signature pedagogies of their disciplines Nothing uncovers hidden assumptions about desired knowledge skills and dispositions better than a careful examination of our most cherished practices The authors inspire specialists in other disciplines to do the same Furthermore they invite other colleagues to explore whether relatively new interdisciplinary fields such as Women s Studies and Global Studies have or should have a signature pedagogy consistent with their understanding of what it means to apprentice in these areas Anthony A Ciccone Senior Scholar and Director Carnegie Academy for the Scholarship of Teaching and Learning

How do individual disciplines foster deep learning and get students to think like disciplinary experts With contributions from the sciences humanities and the arts this book critically explores how to best foster student learning within and across the disciplines This book represents a major advance in the Scholarship of Teaching and Learning SoTL by moving beyond individual case studies best practices and the work of individual scholars to focus on the unique content and characteristic pedagogies of major disciplines Each chapter begins by summarizing the SoTL literature on the pedagogies of a specific discipline and by examining and analyzing its traditional practices paying particular attention to how faculty evaluate success Each concludes by articulating for its discipline the elements of a signature pedagogy that will improve teaching and learning and by offering an agenda for future research Each chapter explores what the pedagogical literature of the discipline suggests are the optimal ways to teach material in that field and to verify the resulting learning Each author is concerned about how to engage students in the ways of knowing the habits of mind and the values used by experts in his or her field Readers will not only benefit from the chapters most relevant to their disciplines As faculty members consider how their courses fit into the broader curriculum and relate to the other disciplines and design learning activities and goals not only within the discipline but also within the broader objectives of liberal education they will appreciate the cross disciplinary understandings this book affords
