Pattern Recognition and Image Analysis Earl Gose, Richard Johnsonbaugh, Steve Jost, 2015 **Pattern Recognition and Image Processing**, 1979 **Pattern Recognition and Image Analysis**, 2011-11-30 **Arts & Humanities**

Citation Index, 1980 A multidisciplinary index covering the journal literature of the arts and humanities. It fully covers 1 144 of the world's leading arts and humanities journals and it indexes individually selected relevant items from over 6 800 major science and social science journals **Pattern Recognition** Sergios Theodoridis, Konstantinos Koutroumbas, 2006-04-07

Pattern recognition is a fast growing area with applications in a widely diverse number of fields such as communications engineering bioinformatics data mining content based database retrieval to name but a few. This new edition addresses and keeps pace with the most recent advancements in these and related areas. This new edition also covers Data Mining which was not treated in the previous edition and is integrated with existing material in the book. b includes new results on Learning Theory and Support Vector Machines that are at the forefront of today's research with a lot of interest both in academia and in applications oriented communities. c for the first time treats audio along with image applications since in today's world the most advanced applications are treated in a unified way and d the subject of classifier combinations is treated since this is a hot topic currently of interest in the pattern recognition community. The latest results on support vector machines including v SVM's and their geometric interpretation. Classifier combinations including the Boosting approach. State of the art material for clustering algorithms tailored for large data sets and/or high dimensional data as required by applications such as web mining and bioinformatics. Coverage of diverse applications such as image analysis, optical character recognition, channel equalization, speech recognition and audio classification **Pattern Recognition and Image Processing** D. Luo, 1998-09-01

This book delivers a course module for advanced undergraduates, postgraduates and researchers of electronics computing science, medical imaging or wherever the study of identification and classification of objects by electronics driven image processing and pattern recognition is relevant. Object analysis first uses image processing to detect objects and extract their features then identifies and classifies them by pattern recognition. Its manifold applications include recognition of objects in satellite images which enable discrimination between different objects such as fishing boats, merchant ships or warships, machine spare parts e.g. screws, nuts etc, engineering detection of cancers, ulcers, tumours and so on, medicine and recognition of soil particles of different types, agriculture or soil mechanics in civil engineering. Outlines the identification and classification of objects by electronics driven image processing and pattern recognition. Discusses object detection, shape, roundness and sharpness analysis, orientation analysis and arrangement analysis. Delivers a course module for advanced undergraduates, postgraduates and researchers of electronics computing science and medical imaging **Proceedings IEEE Computer Society**, 1977 **Pattern Recognition and Machine Learning** Y. Anzai, 2012-12-02
