framework of the UK's National Curriculum. Each topic explored in this essential book provides teachers and teaching assistants with historical, geographic, and cultural context to build confidence when planning and teaching. Full lesson plans and printable worksheets are incorporated into each topic alongside tips to build future lessons in line with the themes explored. Volume II of this book explores the following parts: Part 1 guides teachers through planning and delivering lessons focused on Africa. Pupils will benefit from developing a diverse and accurate understanding of the changing nature of Africa throughout history, linking the continent's social history with its geographical features. Part 2, The Caribbean, builds upon the lesson plans of Part 1 to further highlight the interconnectedness of diaspora cultures in influencing the musical, visual, and religious practices of the Caribbean and Central America. Part 3 begins by addressing the incorrect assumption that the history of Black people in the Americas begins and ends with plantation slavery. Instead, this section proposes a range of in-depth lesson plans on the diverse histories, cultures, and experiences of Black people within the United States.

Created by BLAM UK, this highly informative yet practical resource is an essential read for any teacher, teaching assistant, or senior leader who wishes to diversify their curriculum and address issues of Black representation within their school. It is published in two practical and comprehensive volumes: Volume 1 covers Britain and Europe, whilst Volume 2 includes Africa, the Americas, and the Caribbean. Each volume can be used individually for teaching, but when used together, they provide a truly global perspective on Black history and culture.

Object Lessons Caren Holtzman, Lynn Susholtz, 2024-11-15

When Caren Holtzman and Lynn Susholtz look around a classroom, they see a veritable goldmine of mathematical investigations involving number, measurement, size, shape, symmetry, ratio, and proportion. They also think of the ways great artists have employed these concepts in their depictions of objects and space. For example, Picasso's use of geometric shapes in his Cubist still lifes, or contemporary artist Tara Donovan's room-sized sculptures of everyday items. In their new book *Object Lessons*, Caren, a math educator, and Lynn, an artist and art educator, use a highly visual approach to show students and teachers the art in math and the math in art. Integrating visual arts into math experiences makes the lessons accessible, engaging, and meaningful for a wide range of students. In each chapter, the authors use everyday objects to create rigorous hands-on activities that address key mathematics standards and concepts. Each lesson provides an introduction to the featured object that explains how it connects to key mathematical concepts, a discussion of the artist's art styles and techniques, featured activities organized by grade level and math content area, the basic materials required to prepare and teach each lesson, a clear picture of what the lesson will look like in a classroom, and a list of resources. The book and its accompanying CD feature a wonderful gallery of images, including art photos and student work, and a collection of links to art education organizations, museums, and Web sites that focus on the work of forty major artists.
