Ethnography and Education in the South Diana Milstein, Regina Coeli Machado e Silva, Sofia Marques da Silva, 2025-03-28 This book presents results of educational ethnographies carried out in non hegemonic academies situated in the South The chapters bring out methodological and theoretical contributions and offer the possibility to discuss tensions between universalizable and local ways of knowing and the emergence of alternative schools of ethnographic thinking The term South transcends geographical location to refer allegorically to the generation of situated knowledge and experience and to original ways of producing knowledge that show how social theories about the modern world from non hegemonic academies are equal in intellectual rigour and often of greater political relevance to our changing world The chapters take education in an ample sense considering that educational processes extrapolate the school context and transcend institutionalised forms The various singularities of the educational ethnographies exposed here try to make explicit aspects of this tension between universalizable and local ways of knowing They reach issues of the relationship of collective knowledge with learning cognition socialization transmission of culture languages and corporeality They also analyse local educational practices in scenarios of intense political conflict where issues such as poverty migration gender ethnicity memory territory and academic training intersect The book brings to light the range of contributions that emerged since the last decade of the twentieth century and stimulates the understanding of the breadth and extension of Ethnography and Education It was originally published as a special issue of the journal Ethnography and Education **Pesher and Hypomnema: A Comparison of Two Commentary Traditions from the Hellenistic-Roman Period** Pieter B. Corporate Strategy, Liquidity, Revenue and Profit** Jagnoor Bhalla, 2021-04-20 Seminar paper from the year 2020 in the subject Business economics Investment and Finance grade 1.3 University of Applied Sciences Augsburg language English abstract This paper will examine the corporate success of Amazon.com Inc in times of the dot.com bubble compared to its performance in times of the corona crisis The comparison of the company during these financial crises will include corporate strategy the company's liquidity revenue and profit It will also analyse stock prices and the performance on the stock market as well as the number of employees and their compensation as indicators for its financial situation and the company's success Looking at the global economy it is clear to see that financial crises are occurring from time to time challenging companies in many ways to innovate and find solutions and get through financially instable times with minimal losses There are also different types of crises which are weakening especially certain economic sectors The internet crisis and the corona crisis both had an immense impact on the financial market and the business world Considering these two crises which are very different or almost contradictory to each other it seems to be interesting to compare the performance of an internet company which began as one of these dot.com startups during the internet crisis but is still innovative and successful to this day even during the corona crisis **The Amazon Treaty** David Ware, 1980 **A Regional Geography for Advanced and Scholarship Courses** Laurence Dudley Stamp, 1953 **The**
