Functional Foods and Immunity Aadinath Pothuval, 2024-12-15 Functional Foods and Immunity Nutritional Defense Against COVID 19 explores how dietary choices can bolster your immune system to combat the COVID 19 pandemic. As the World Health Organization declared COVID 19 a global pandemic it became crucial to adopt key measures to protect ourselves. Beyond maintaining hygiene standards like frequent hand washing especially after using public transport strengthening our immunity is essential. Individuals with pre existing conditions such as diabetes hypertension cardiovascular disease and respiratory issues are at higher risk of severe COVID 19 complications which also increase with age. Conversely younger individuals with strong immunity can often experience milder symptoms. Our dietary choices significantly impact our health and immunity. Consuming a low carb diet can help manage blood sugar and pressure while a protein rich diet keeps us in good shape. Regularly eating vegetables and fruits rich in beta carotene ascorbic acid and other essential vitamins boosts our resilience. Foods like mushrooms tomatoes bell peppers broccoli and spinach are excellent for building immunity against infections. The urgent need is to quickly enhance our immune systems to stay healthy. Adopting a proper diet and taking immunity boosting measures will help us stay resilient.
