

WHAT IS NAVIGATION?

Navigation is the action of moving through water using various means such as boats, vessels, or even spacecraft.

It involves planning and directing the course of a vehicle through maritime, river, or even aerial routes, aiming to reach a specific destination.

To orient themselves, navigators use instruments such as compasses, maps, and Global Positioning System (GPS) devices.

Navigation has been essential for trade, exploration, and transportation throughout history, enabling people to connect, discover new places, and broaden their horizons.
