Revolutionary Pricing Matthew Bamigbose,2022-10-31 Pricing your services products is the most important decision when you are looking to sell something online The Internet offers customers thousands of choices so you need to be on par with your competitors Price completely determines how long you can stay in the market You should have a clear idea of the price How far can you push it How often should I check prices Much depends on how you handle this stage of your business First you need to identify a group of consumers then estimate how much they are willing to pay for your service or product But apart from that you also have to make sure you are making a profit for yourself And often these two requirements can conflict Different people price products in different ways Some are science based some are not This is a procedure that works based on the understanding of production costs customer expectations and other players in the field A

Sentiment-Based Model for the Bitcoin Alessandra Cretarola,2019 In recent literature it is claimed that BitCoin price behaves more likely to a volatile stock asset than a currency and that changes in its price are influenced by sentiment about the BitCoin system itself in Kristoufek the author analyses transaction based as well as popularity based potential drivers of the BitCoin price finding positive evidence Here we endorse this finding and consider a bivariate model in continuous time to describe the price dynamics of one BitCoin as well as a second factor affecting the price itself which represents a sentiment indicator We prove that the suggested model is arbitrage free under a mild condition and based on risk neutral evaluation we obtain a closed formula to approximate the price of European style derivatives on the BitCoin By applying the same approximation technique to the joint likelihood of a discrete sample of the bivariate process we are also able to fit the model to market data This is done by using both the Volume and the number of Google searches as possible proxies for the sentiment factor Further the performance of the pricing formula is assessed on a sample of market option prices obtained by the Deribit website
