2025 Roblox Building

Daniela Niemeyer

2025 Roblox Building:

A New Approach to Reading Videogames as Story Thomas Rowland, 2026-01-27 This book introduces a new methodology for understanding videogames with particular attention to three types of videogames: toy games, storybook games, and ludonarratives. This methodology pulls from phenomenological and deconstructionist roots informed by medieval studies and the history of reading to emphasize how important playing stories can be as a form of narrative. This book explores the idea of storyplaying in connection with new ideas on interactive movement, game mechanics, and sacred play to develop a typology of videogames that will enable critics, educators, and theorists to situate videogames within a broad continuum of literary history. Building on this foundation, this book continues by exploring additional facets of this methodology by exploring the relationship between videogames and film criticism, the emerging art world of game-mediated photography, the various economies constructed around videogames, the potential of games to serve as third places, and some suggestions for videogames in the classroom. These ideas are contextualized by the author's argument that videogames serve a purpose akin to the original function of medieval cathedrals as intentional virtual spaces with dedicated and important meditation, which given today's decadent cultural and political climate underscores the urgency of recognizing videogames as being vital to our scholarly and educational enterprises. Journalism and the Metaverse John V. Pavlik, 2024-06-04

Journalism has been in a state of disruption since the development of the Internet. The Metaverse, what some describe as the future of the Internet, is likely to fuel even further disruption in journalism. Digital platforms and journalism enterprises are already investing substantial resources into the Metaverse or its likely components of augmented reality, virtual reality, and artificial intelligence. Although research shows most of the public has little knowledge of the Metaverse, many are keenly interested in what it or its components may bring. Gartner 2022 predicts that a quarter of the public will spend at least one hour per day in the Metaverse by 2026. Journalism may be an important part of this future. This book will provide a critical examination of the implications of the Metaverse for the continuing transformation of journalism in the digital age. **2nd**

Borroni, Guido Perboli, Gian Maria Piccinelli, 2026-01-02 This volume offers an in-depth analysis of the metaverse and its implications with other more advanced technologies through an interdisciplinary approach that bridges the social sciences with the hard sciences. The interaction among the latest technologies emerges as a pivotal element of contemporary transformation, marking the transition to a new era in which the boundary between the real and the digital becomes increasingly blurred while the physical dimension progressively yields space to the immaterial. This scenario raises issues of great theoretical and practical significance, prompting questions about the future of human interactions, economic dynamics, and governance models. The contributions gathered in this volume explore the critical implications and challenges that arise across different fields of knowledge, offering a nuanced reflection on the relationship between law, economics, and technological innovation.
