

**At long last, a book about small, residential-scale hydroelectricity. Our industry has been looking for this book for some time now!**

—DANIEL MATH, Technical Editor, *HydroWorld*

Hydroelectricity is the fourth largest — and cheapest — source of renewable energy for the U.S. It takes a considerable energy to generate, there is an enormous amount of water power in the technology that has been called "the engine" that makes our modern way of life possible.

**Highly detailed and practical.** *Microhydro* is the first complete book in the field of small-scale (ranging from 100 watt to 100 kW) systems, a first introduced by the author's extensive experience in the field, including the advantages and disadvantages of using small systems to generate power in their homes or farms.

- How to select your particular electrical needs
- How to select your specific site — including measurement of water flow, water pressure, head, flow velocity, and the choice of site
- How to choose the appropriate system for your needs — including all systems with turbines and generators, and the systems with generating devices
- How to design a complete system, including turbine, generator, and power supply
- The correct regulation and control of the generating system
- How to install and maintain the system

**Along with a glossary of microhydro terms, turbine making and installation — including plans of commercial suppliers — *Microhydro* includes all the information a homeowner needs to select and generate their own power and independent power.**

**The microhydro world is a vast one, and this book is a must-read for anyone who wants to get into the field. It is a book that is a must-read for anyone who wants to get into the field. It is a book that is a must-read for anyone who wants to get into the field. It is a book that is a must-read for anyone who wants to get into the field.**

—DANIEL MATH, Technical Editor, *HydroWorld*

**This book offers a complete guide to the design and construction of a small-scale hydroelectric system. It is a book that is a must-read for anyone who wants to get into the field. It is a book that is a must-read for anyone who wants to get into the field. It is a book that is a must-read for anyone who wants to get into the field.**

—DANIEL MATH, Technical Editor, *HydroWorld*

**Microhydro is a book that is a must-read for anyone who wants to get into the field. It is a book that is a must-read for anyone who wants to get into the field. It is a book that is a must-read for anyone who wants to get into the field.**

## **Microhydro Clean Power From Water Wise Living:**

*Energy-Wise Landscape Design* Sue Reed, 2010-04-01 An inspiring instructional handbook for transforming idealism into social change The pursuit of freedom and justice is a timeless one but new activists may not know where to begin while more experienced ones often become jaded or fatigued The task of constructing a new society free from oppression and inequality can be overwhelming Tools for facilitating motivation engagement and communication can mean the difference between failure and success for activists and social movements Educating for Action collects the voices of activists whose combined experience in confronting injustice has generated a wealth of key insights for creating social change This practical guide explores such topics as Community activism and direct democracy Conflict negotiation communication and rhetoric Law the educational system and lifestyle activism Social media skills conference planning and online organizing Written in an inspirational tone Educating for Action consciously straddles the line between street activism and classroom instruction Bridging the gap between these two worlds makes for an engaging and instructive manual for social justice helping students teachers and larger activist communities turn their idealism into action Jason Del Gandio is a scholar activist and assistant professor of rhetoric and public advocacy at Temple University He is the author of *Rhetoric for Radicals A Handbook for 21st Century Activists* Anthony J Nocella II is a scholar activist and senior fellow of the Dispute Resolution Institute at the Hamline Law School He is a long time anti racism youth justice prison abolition hip hop animal disability and Earth liberation activist and has published over fifty scholarly articles and book chapters and sixteen books      [Self-Sufficient Living](#) Elian Wildgrove, AI, 2025-02-27 Self Sufficient Living dives into the practicalities of creating a more independent and sustainable lifestyle through producing your own food and energy It explores how modern technology such as hydroponics and solar panels combined with age old practices can empower individuals to reduce their reliance on conventional supply chains Discover tangible solutions to diminishing resources and climate change by understanding sustainable agriculture which minimizes environmental impact while maximizing yields and renewable energy generation harnessing natural resources for electricity and heat The book progresses logically first introducing fundamental concepts and debunking misconceptions then delving into specific techniques like soil management and solar panel installation It culminates with real world examples of self sufficient communities highlighting benefits and lessons learned What sets this book apart is its hands on approach providing readers with the knowledge to implement these systems emphasizing experimentation and adaptation and encouraging collaboration Ultimately Self Sufficient Living demonstrates that achieving a significant degree of self reliance is within reach for many regardless of location or prior experience It challenges the notion of complete dependence on centralized systems and empowers readers to take proactive steps toward a more sustainable and secure future through homesteading food production and energy production      **Making Better Buildings** Chris Magwood, 2014-03-01 Sustainable building from the ground up the pros and cons of the latest green and natural materials and technologies From

foundation to finish a wealth of information is available on sustainable construction methods entire volumes have been published on individual green and natural building techniques But with so many different ideas to choose from there is no single resource that allows an owner or builder to quickly and objectively compare the merits of each system for their particular project Making Better Buildings cuts through the hype and provides the unvarnished facts about the upsides and downsides of the most widely discussed materials and technologies Drawing on the real world experiences of designer builders this comparative guide systematically and comprehensively examines each approach in terms of Cost sourcing labor intensity and ease of construction Energy efficiency embodied energy and environmental impacts Availability accessibility Viable applications and future potential Each chapter is rounded out by a chart which summarizes the material in a quick and accessible manner Whether you are an owner preparing to build a green or natural home or a conventional contractor determined to integrate sustainable alternatives into your existing construction practices this up to the minute resource will help you make the best decisions for your project while meeting your energy efficiency budgetary and site specific needs
