Introduction

Microsoft Excel has become the tool of choice for accountants and business professionals. With so much choice, power and functionality to consider, Microsoft Excel is the number one reporting tool of choice for most accountants in any size of organization. Many Accountants have been using Excel for years, but most are not fully exploiting the power and functionality of this tool to simplify their accounting/workplace roles.

This course is designed to build accountants awareness of the commonly utilized, yet powerful, functionality of Excel while revealing advanced capabilities that are seldom used. We have integrated basic and advanced Microsoft Excel features and customized the course content to accounting to ensure accountants get maximum benefit and be able to simplify their tasks as well as increase their productivity at work.

Objectives

- To equip accountants with in-depth knowledge of the relevant and advanced features in Microsoft Excel.
- To enable participants, apply advanced Microsoft Excel features to accounting routines for higher productivity gains.

What you will learn

This course will make use of case scenarios, to share with participants our knowledge and experience in business intelligence, from turning raw data into useful business information to analyzing the business data for reporting and decision making. Some of the topics that will be covered in this course include:

- Excel Basics like Cell Referencing and order of operations and why accountants need to pay attention to them.
- How to effectively manage and report on accounting data in Excel.
- Date Functions and why they are important in accounting and data analysis.
- How to Import, Clean and Consolidate accounting using Excel.
- How to use Excel LOOKUP functions to manipulate accounting data.
- How to identify and manage duplicate data in Excel
- How to apply Excel Tools like Filters and Subtotals to Accounting data
- How to use Logical and Conditional formulas such as IF, AND, SUMIF etc to manipulate accounting data.
