General practitioners as a widely dispersed group are particularly reliant on e learning. This book provides an overview of the topic and examines the past, present and future challenges, opportunities and benefits. With chapters devoted to creating a website, running short courses and standards and accreditation, this guide explores both vocational training and continuing professional development. It presents an evidence based, practical approach for healthcare educators and practitioners with teaching responsibilities, course organisers and healthcare professionals with an interest in e learning. Excellent Leading edge. As a practising GP I know just how hard it can be to keep up to date in a generalist discipline and showing progress. Having access to information is the straightforward bit, processing it and embedding it into

clinical practice is the much bigger challenge as this book rightly points out As a user of e learning I know how useful this technique can be if undertaken properly and to a defined standard I have no doubt that this book will be a valuable contribution creating an innovative learning culture and society in healthcare Mayur Lakhani in his Foreword
