Migration In World History:

Migration Michael H. Fisher, 2013-11-04 Migration began with our origin as the human species and continues today Each chapter of world history features distinct types of migration The earliest migrations spread humans across the globe Over the centuries as our cultures societies and technologies evolved in different material environments migrants conflicted merged and cohabited with each other creating entering and leaving various city states kingdoms empires and nations During the early modern period migrations reconnected the continents including through colonization and forced migrations of subject peoples while political concepts like citizen and alien developed In recent history migrations changed their character as nation states and transnational unions sought in new ways to control the peoples who migrated across their borders This volume will explore the process of migration chronologically and also at several levels from the illuminating example of the migration of a individual community to larger patterns of the collective movements of major ethnic groups to the more abstract study of the processes of emigration migration and immigration This book will concentrate on substantial migrations covering long distances and involving large numbers of people It will intentionally balance evidence from the now diverse people s of the world for example by highlighting an exemplary migration for each of the six chapters that highlights different trajectories and by keeping issues of gender and socio economic class salient wherever appropriate Further as a major theme the volume will consider how technology the environment and various polities have historically shaped human migration Exciting new scholarship in the several fields inherent in this topic make it a particularly valuable and timely project

Handbook on Migration and Social Policy Gary P. Freeman, Nikola Mirilovic, 2016-02-27. In this comprehensive Handbook, an interdisciplinary team of distinguished scholars from the social sciences explores the connections between migration and social policy. They test conflicting claims as to the positive and negative effects of different types of migration against the experience of countries in Europe, North America, Australasia, the Middle East, and South Asia, assessing arguments as to migration's impact on the financial, social, and political stability, and sustainability of social programs. The volume reflects the authors' curiosity about the controversy over the connection between social and cultural diversity and popular support for the welfare state. Providing timely and original chapters which both critique the existing literature as well as build on and advance theoretical understanding, the authors focus on the formal settlement and integration policies created for migrants as well as corollary state policies affecting migrants and migration. A clutch of chapters investigates the linkage between migration and trade theory, foreign direct investment, globalization, public opinion, public education, and welfare programs. Chapters then deal with leading receiving states as well as India, and the authors examine the regulation of migration at the subnational, national, regional, and global levels. The topic of migration and security is also covered. This compelling and exhaustive review of existing scholarship and state-of-the-art original empirical analysis is essential reading for graduates and academics researching the field.
